I – VIII SEMESTERS CURRICULA AND SYLLABI

SEMESTER I

CODE	COURSE TITLE	L	T	P	C
THEORY					
HS8151	Technical English – I	3	1	0	4
MA8151	Mathematics – I	3	1	0	4
PH8151	Engineering Physics	3	0	0	3
CY8151	Engineering Chemistry	3	0	0	3
GE8151	Computing Techniques	3	0	0	3
GE8152	Engineering Graphics	2	0	3	4
PRACTICAL					
PH8161	Physics Laboratory	0	0	2	1
CY8161	Chemistry Laboratory	0	0	2	1
GE8161	Computer Practices Laboratory	0	0	3	2
GE8162	Engineering Practices Laboratory	0	0	3	2
Total		17	2	13	27

SEMESTER II

CODE	COURSE TITLE	L	T	P	C
THEORY					
HS8251	Technical English II	3	1	0	4
MA8251	Mathematics II	3	1	0	4
PH8255	Physics of Materials	3	0	0	3
CY8253	Chemistry for Technologists	3	0	0	3

GE8251	Engineering Mechanics	3	1	0	4
LT8201	Introduction to Leather Manufacture	3	0	0	3
PRACTICAL					
PH8261	Applied Physics Laboratory	0	0	2	1
CY8261	Applied Chemistry Laboratory	0	0	2	1
	TOTAL	18	3	4	23

SEMESTER III

CODE	COURSE TITLE	L	T	P	C
THEORY					
MA8355	Probability and Random Processes	3	1	0	4
CY8351	Instrumental Methods of Analysis	3	0	0	3
EE8252	Principles of Electrical and Electronics Engineering	3	0	0	3
LT8301	Basic Biochemistry and Microbiology	3	0	0	3
LT8302	Inorganic and Organic Chemistry	3	0	0	3
LT8303	Theory of Skin Proteins and Pre-tanning Processes	3	0	0	3
PRACTICAL					
EE8261	Electrical and Electronics Lab	0	0	3	2
LT8311	Tannery Practice – I	0	0	4	2
	TOTAL	18	1	7	23

SEMESTER IV

CODE	COURSE TITLE	L	T	P	C
THEORY					
MA8353	Numerical Methods	3	1	0	4
CY8451	Physical Chemistry	3	0	0	3
LT8401	Technology of Heavy Leather Manufacture	3	0	0	3
LT8402	Theory and Practice of Chrome and Inorganic Tannages	3	0	0	3

LT8403	Theory and Practice of Vegetable and Organic Tannages	3	0	0	3
LT8404	Theory of Material Testing of Leathers – I	3	0	0	3
PRACTICAL					
LT8411	Material Testing Laboratory – I	0	0	4	2
LT8412	Tannery Practice – II	0	0	6	3
	TOTAL	18	1	10	24

SEMESTER V

CODE	COURSE TITLE	L	T	P	C
THEORY					
LT8501	Polymer Science	3	0	0	3
LT8502	Technology of Light Leather Manufacture	3	0	0	3
LT8503	Theory and Practice of Post Tanning Processes	3	0	0	3
LT8504	Theory of Material Testing of Leathers – II	3	0	0	3
LT8505	Principles of Unit Operations and Unit Processes in Leather and Leather Chemicals Manufacture	3	0	0	3
	Elective I	3	0	0	3

LT8021	Leather Bio Technology and its Application in Leather	3	0	0	3
LT8022	Computer Applications for Leather and Leather Products	3	0	0	3

TOTAL NO. OF CREDITS : 176

OBJECTIVES

- To enable all students of engineering and technology develop their basic communication skills in English.
- To give special emphasis to the development of speaking skills amongst the students of engineering and technology students.
- To ensure that students use the electronic media such as internet and supplement the learning materials used in the classroom.
- To inculcate the habit of reading for pleasure.

UNIT I

Listening - Introducing learners to GIE - Types of listening - Listening to audio (verbal & sounds); Speaking - Speaking about one's place, important festivals etc. – Introducing oneself, one's family / friend; Reading - Skimming a reading passage – Scanning for specific information - Note-making; Writing - Free writing on any given topic (My favourite place / Hobbies / School life, etc.) - Sentence completion - Autobiographical writing (writing about one's leisure time activities, hometown, etc.); Grammar - Prepositions - Reference words - Wh-questions - Tenses (Simple); Vocabulary - Word formation - Word expansion (root words / etymology); E-materials - Interactive exercises for Grammar & Vocabulary - Reading comprehension exercises - Listening to audio files and answering questions.

UNIT II

Listening - Listening and responding to video lectures / talks; Speaking - Describing a simple process (filling a form, etc.) - Asking & answering questions - Telephone skills – Telephone etiquette; Reading – Critical reading - Finding key information in a given text - Sifting facts from opinions; Writing - Biographical writing (place, people) - Lab descriptions (general/specific description of laboratory experiments) - Definitions - Recommendations; Grammar - Use of imperatives - Subject-verb agreement; Vocabulary - Compound words - Word Association; E-materials - Interactive exercises for Grammar and Vocabulary - Listening exercises with sample telephone conversations / lectures – Picture-based activities.

UNIT III

Listening - Listening to specific task - focused audio tracks; Speaking - Role-play – Simulation - Group interaction - Speaking in formal situations (teachers, officials, foreigners); Reading - Reading and interpreting visual material; Writing - Jumbled sentences - Coherence and cohesion in writing - Channel conversion (flowchart into process) - Types of paragraph (cause

& effect / compare & contrast / narrative / analytical) - Informal writing (letter/e-mail/blogs) - Paraphrasing; Grammar - Tenses (Past) - Use of sequence words - Adjectives; Vocabulary - Different forms and uses of words, Cause and effect words; E-materials - Interactive exercises for Grammar and Vocabulary - Excerpts from films related to the theme and follow up exercises - Pictures of flow charts and tables for interpretations.

UNIT IV

Listening - Watching videos / documentaries and responding to questions based on them; Speaking - Responding to questions - Different forms of interviews - Speaking at different types of interviews; Reading - Making inference from the reading passage - Predicting the content of a reading passage; Writing - Interpreting visual materials (line graphs, pie charts etc.) - Essay writing – Different types of essays; Grammar - Adverbs – Tenses – future time reference; Vocabulary - Single word substitutes - Use of abbreviations & acronyms; E-materials - Interactive exercises for Grammar and Vocabulary - Sample interviews - film scenes - dialogue writing.

UNIT V

Listening - Listening to different accents, Listening to Speeches/Presentations, Listening to broadcast & telecast from Radio & TV; Speaking - Giving impromptu talks, Making presentations on given topics; Reading - Email communication - Reading the attachment files having a poem/joke/proverb - Sending their responses through email Writing - Creative writing, Poster making; Grammar - Direct and indirect speech; Vocabulary - Lexical items (fixed / semi fixed expressions); E-materials - Interactive exercises for Grammar & Vocabulary - Sending emails with attachment – Audio / video excerpts of different accents, - Interpreting posters.

TOTAL : 60 PERIODS

TEXT BOOKS

1. Mindscapes: English for Technologists and Engineers, Orient Black Swan, 2012 .
2. S.P. Dhanavel, English and Communication Skills for Students of Science and Engineering, Orient Black Swan, Chennai, 2011.

REFERENCES

4. www.owl.english.purdue.edu
5. www.chompchomp.com

OBJECTIVES

1. To develop the use of matrix algebra techniques this is needed by engineers for practical applications.
2. To make the student knowledgeable in the area of infinite series and their convergence so that he/ she will be familiar with limitations of using infinite series approximations for solutions arising in mathematical modeling.
3. To familiarize the student with functions of several variables. This is needed in many branches of engineering.
4. To introduce the concepts of improper integrals, Gamma, Beta and Error functions which are needed in engineering applications.
5. To acquaint the student with mathematical tools needed in evaluating multiple integrals and their usage.

UNIT I MATRICES**9+3**

Eigenvalues and Eigenvectors of a real matrix – Characteristic equation – Properties of eigenvalues and eigenvectors – Cayley-Hamilton Theorem – Diagonalization of matrices – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms.

UNIT II INFINITE SERIES**9+3**

Sequences – Convergence of series – General properties – Series of positive terms – Tests of convergence (Comparison test, Integral test, Comparison of ratios and D'Alembert's ratio test) – Alternating series – Series of positive and negative terms – Absolute and conditional convergence – Power Series – Convergence of exponential, logarithmic and Binomial Series.

UNIT III FUNCTIONS OF SEVERAL VARIABLES**9+3**

Limits and Continuity – Partial derivatives – Homogeneous functions and Euler's theorem – Total derivative – Differentiation of implicit functions – Change of variables – Jacobians – Partial differentiation of implicit functions – Taylor's series for functions of two variables – Errors and approximations – Maxima and minima of functions of two variables – Lagrange's method of undetermined multipliers.

UNIT IV IMPROPER INTEGRALS**9+3**

Improper integrals of the first and second kind and their convergence – Evaluation of integrals

involving a parameter by Leibnitz rule – Beta and Gamma functions – Properties – Evaluation of integrals using Beta and Gamma functions – Error functions

UNIT V MULTIPLE INTEGRALS

9+3

Double integrals – Change of order of integration – Double integrals in polar coordinates – Area enclosed by plane curves – Triple integrals – Volume of Solids – Change of variables in double and triple integrals – Area of a curved surface.

TOTAL : 60 PERIODS

TEXT BOOKS

1. Grewal B.S., “Higher Engineering Mathematics”, Khanna Publishers, New Delhi, 40th Edition, 2007.
2. Ramana B.V., “Higher Engineering Mathematics”, Tata McGraw Hill Co. Ltd., New Delhi, 11th Reprint, 2010.

PH8151

ENGINEERING PHYSICS

L T P C

(Common to All Branches of B.E / B.Tech. programmes)

3 0 0 3

OBJECTIVE

To introduce the basic physics concepts relevant to different branches of Engineering and Technology.

UNIT I PROPERTIES OF MATTER

9

Elasticity - Poisson’s ratio and relationship between moduli (qualitative) - Stress-strain diagram - factors affecting elasticity - bending of beams - cantilever - bending moment - theory and experiment of Young’s modulus determination - Uniform and non-uniform bending - I shaped

TEXT BOOKS

1. Gaur R.K., and Gupta, S.L., Engineering Physics, Dhanpat Raj Publications, 2003.
2. Palanisamy, P.K., Engineering Physics, Scitech Publications (P) Ltd, 2006.
3. Arumugam, M., Engineering Physics, Anuradha Publications, 2000.

REFERENCE BOOKS

1. Sankar, B.N., Pillai.S.O., Engineering Physics, New Age International (P) Ltd., 2007.
2. Rajendran.V Engineering Physics, Tata McGraw-Hill, 2009.

CY8151

ENGINEERING CHEMISTRY
(Common to All Branches of Engineering and Technology)

L T P C

3 0 0 3

UNIT I CHEMICAL THERMODYNAMICS

9

Second law: Entropy - entropy change for an ideal gas, reversible and irreversible processes; entropy of phase transitions; Clausius inequality. Free energy and work function: Helmholtz and Gibbs free energy functions; Criteria of spontaneity; Gibbs-Helmholtz equation; Clausius-Clapeyron equation; Maxwell relations – Van't Hoff isotherm and isochore. Chemical potential; Gibbs-Duhem equation – variation of chemical potential with temperature and pressure.

UNIT II POLYMER CHEMISTRY

9

Introduction: Classification of polymers – Natural and Synthetic; Thermoplastic and Thermosetting. Functionality – Degree of polymerisation. Types and mechanism of polymerisation: Addition (Free Radical, cationic, anionic and living); condensation and copolymerisation. Properties of polymers: T_g, Tacticity, Molecular weight – weight average, number average and polydispersity index. Techniques of polymerisation: Bulk, emulsion, solution and suspension.

UNIT III KINETICS AND CATALYSIS

9

Introduction – reaction velocity, factors affecting reaction velocity, rate constant, order of reaction, molecularity, pseudo molecular reactions, zero, first, second and third order reactions, reactions of fractional orders, determination of order of reactions. Catalysis: Auto catalysis - Enzyme Catalysis: Michaelis-Menton equation; factors affecting enzyme catalysis. Heterogeneous Catalysis: Types of adsorption isotherms: Langmuir–Hinselwood and Rideal–Eley Mechanism.

UNIT IV PHOTOCHEMISTRY AND SPECTROSCOPY**9**

Photochemistry: Laws of photochemistry - Grothuss–Draper law, Stark–Einstein law and Lambert-Beer Law. Photoprocesses - Internal Conversion, Inter-system crossing, Fluorescence, Phosphorescence, Chemiluminescence and Photo-sensitisation. Spectroscopy: Electromagnetic spectrum - Absorption of radiation – Electronic, Vibrational and rotational transitions. Width and intensities of spectral lines. Spectrophotometric estimation of iron. UV-visible and IR spectroscopy – principles, instrumentation (Block diagram) and applications.

UNIT V NANOCHEMISTRY**9**

Basics - distinction between molecules, nanoparticles and bulk materials; size-dependent properties. Nanoparticles: Nanocluster, nanorod, nanotube and nanowire. Synthesis: Precipitation, thermolysis, hydrothermal, solvothermal, electrodeposition, chemical vapour deposition, laser ablation; Properties and Applications. Risk discussion and Future perspectives.

TOTAL : 45 PERIODS**TEXT BOOKS**

1. P. Kannan and A. Ravikrishnan, "Engineering Chemistry", Sri Krishna Hitech Publishing Company Pvt. Ltd. Chennai, 2009.
2. S. Vairam, P. Kalyani and Suba Ramesh, "Engineering Chemistry", Wiley India, 2011

REFERENCES

1. P.W. Atkins and de Paula Julio, "Physical Chemistry", Oxford University Press, 8th Ed., (Indian Student Edition) (2009).
2. K. K. Rohatgi-Mukherjee, "Fundamental of Photochemistry" New Age International (P) Ltd., New Delhi, 1986.
3. G.A. Ozin and A.C. Arsenault, "Nanotechnology: A Chemical Approach to Nanomaterials", RSC Publishing, 2005.
4. V.R.Gowariker, N.V.Viswanathan and Jayadev Sreedhar, "Polymer Science", New Age International P (Ltd.), Chennai, 2006

GE8151**COMPUTING TECHNIQUES****L T P C****3 0 0 3****UNIT I INTRODUCTION****8**

Generation and Classification of Computers- Basic Organization of a Computer –Number System – Binary – Decimal – Conversion – Problems. Need for logical analysis and thinking – Algorithm – Pseudo code – Flow Chart.

UNIT II C PROGRAMMING BASICS**10**

Problem formulation – Problem Solving - Introduction to 'C' programming –fundamentals – structure of a 'C' program – compilation and linking processes – Constants, Variables – Data Types – Expressions using operators in 'C' – Managing Input and Output operations – Decision Making and Branching – Looping statements – solving simple scientific and statistical problems.

UNIT III ARRAYS AND STRINGS**9**

Arrays – Initialization – Declaration – One dimensional and Two dimensional arrays. String-String operations – String Arrays. Simple programs- sorting- searching – matrix operations.

UNIT IV FUNCTIONS AND POINTERS**9**

Function – definition of function – Declaration of function – Pass by value – Pass by reference – Recursion – Pointers - Definition – Initialization – Pointers arithmetic – Pointers and arrays- Example Problems.

UNIT V STRUCTURES AND UNIONS**9**

Introduction – need for structure data type – structure definition – Structure declaration – Structure within a structure - Union - Programs using structures and Unions – Storage classes, Pre-processor directives.

TOTAL : 45 PERIODS**TEXTBOOKS**

1. Pradip Dey, Manas Ghosh, "Fundamentals of Computing and Programming in C", First Edition, Oxford University Press, 2009
2. Ashok N. Kamthane, "Computer programming", Pearson Education, 2007.
3. Yashavant P. Kanetkar. " Let Us C", BPB Publications, 2011.

REFERENCES

1. Kernighan,B.W and Ritchie,D.M, "The C Programming language", Second Edition, Pearson Education, 2006
2. Byron S Gottfried, " Programming with C", Schaum's Outlines, Second Edition, Tata McGraw-Hill, 2006.
3. R.G. Dromey, "How to Solve it by Computer", Pearson Education, Fourth Reprint, 2007

OBJECTIVES

- To develop in students, graphic skills for communication of concepts, ideas and design of engineering products
- To expose them to existing national standards related to technical drawings.

CONCEPTS AND CONVENTIONS (Not for Examination)**1**

Importance of graphics in engineering applications – Use of drafting instruments – BIS conventions and specifications – Size, layout and folding of drawing sheets – Lettering and dimensioning.

UNIT I PLANE CURVES AND FREE HAND SKETCHING**5+9**

Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of ellipse, parabola and hyperbola by eccentricity method – Construction of cycloid – construction of involutes of square and circle – Drawing of tangents and normal to the above curves, Scales: Construction of Diagonal and Vernier scales.

Visualization concepts and Free Hand sketching: Visualization principles –Representation of Three Dimensional objects – Layout of views- Free hand sketching of multiple views from pictorial views of objects

UNIT II PROJECTION OF POINTS, LINES AND PLANE SURFACES**5+9**

Orthographic projection- principles-Principal planes-First angle projection-projection of points. Projection of straight lines (only First angle projections) inclined to both the principal planes - Determination of true lengths and true inclinations by rotating line method and trapezoidal method and traces Projection of planes (polygonal and circular surfaces) inclined to both the principal planes by rotating object method.

UNIT III PROJECTION OF SOLIDS**5 + 9**

Projection of simple solids like prisms, pyramids, cylinder, cone and truncated solids when the axis is inclined to one of the principal planes by rotating object method and auxiliary plane method.

UNIT IV PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES**5+9**

Sectioning of above solids in simple vertical position when the cutting plane is inclined to the one of the principal planes and perpendicular to the other – obtaining true shape of section.

Development of lateral surfaces of simple and sectioned solids – Prisms, pyramids cylinders and cones. Development of lateral surfaces of solids with cut-outs and holes

UNIT V SOMETRIC AND PERSPECTIVE PROJECTIONS

6 + 9

Principles of isometric projection – isometric scale –Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones- combination of two solid objects in simple vertical positions and miscellaneous problems. Perspective projection of simple solids- Prisms, pyramids and cylinders by visual ray method and vanishing point method.

COMPUTER AIDED DRAFTING (Demonstration Only)

3

Introduction to drafting packages and demonstration of their use.

TOTAL : 75 PERIODS

TEXT BOOK

1. N.D.Bhatt and V.M.Panchal, “Engineering Drawing”, Charotar Publishing House, 50th Edition, 2010

Publication of Bureau of Indian Standards:

1. IS 10711 – 2001: Technical products Documentation – Size and lay out of drawing sheets.
2. IS 9609 (Parts 0 & 1) – 2001: Technical products Documentation – Lettering.
3. IS 10714 (Part 20) – 2001 & SP 46 – 2003: Lines for technical drawings.
4. IS 11669 – 1986 & SP 46 – 2003: Dimensioning of Technical Drawings.
5. IS 15021 (Parts 1 to 4) – 2001: Technical drawings – Projection Methods.

Special points applicable to University Examinations on Engineering Graphics:

1. There will be five questions, each of either or type covering all
2. units of the syllabus.
3. All questions will carry equal marks of 20 each making a total of 100.
4. Students will be permitted to use appropriate scale to fit solution within A3 size.
5. The examination will be conducted in appropriate sessions on the same day

PH 8161**PHYSICS LABORATORY****L T P C****(Common to All Branches of B.E. / B.Tech. Programmes)****0 0 2 1**

- | | | | |
|-----|----------------------|---|---|
| 1. | Torsional pendulum | - | Determination of rigidity modulus of wire and moment of inertia of disc |
| 2. | Non-uniform bending | - | Determination of young's modulus |
| 3. | Lee's disc | - | Determination of thermal conductivity of a bad conductor |
| 4. | Potentiometer | - | Determination of thermo e.m.f. of thermocouple |
| 5. | Air wedge | - | Determination of thickness of a thin sheet of paper |

| 10. | Viscosity of liquids | - | Determination of co-efficient of viscosity of a liquid by Poiseuille's flow |

TOTAL : 30 PERIODS**CY 8161****CHEMISTRY LABORATORY****L T P C****(Common to All Branches of Engineering and Technology)****0 0 2 1**

1. Estimation of HCl using Na_2CO_3 as primary standard and Determination of alkalinity in water sample.
2. Determination of total, temporary & permanent hardness of water by EDTA method.
3. Determination of DO content of water sample by Winkler's method.
4. Determination of chloride content of water sample by argentometric method.
5. Estimation of copper content of the given solution by Iodometry.

6. Determination of strength of given hydrochloric acid using pH meter.
7. Determination of strength of acids in a mixture of acids using conductivity meter.
8. Estimation of iron content of the given solution using potentiometer.
9. Estimation of iron content of the water sample using spectrophotometer (1, 10-phenanthroline / thiocyanate method).
10. Estimation of sodium and potassium present in water using flame photometer.
11. Determination of molecular weight of poly vinyl alcohol using Ostwald viscometer.
12. Pseudo first order kinetics – ester hydrolysis.
13. Corrosion experiment – weight loss method.
14. Determination of CMC.
15. Phase change in a solid.

COMPUTER PRACTICES LABORATORY

**L T P C
0 0 3 2**

LIST OF EXPERIMENTS:

1. Search, generate, manipulate data using MS office/ Open Office
2. Presentation and Visualization – graphs, charts, 2D, 3D
3. Problem formulation, Problem Solving and Flowcharts
4. C Programming using Simple statements and expressions
5. Scientific problem solving using decision making and looping.
6. Simple programming for one dimensional and two dimensional arrays.
7. Solving problems using String functions
8. Programs with user defined functions
9. Program using Recursive Function and conversion from given program to flow chart.
10. Program using structures and unions.

TOTAL : 45 PERIODS

OBJECTIVE

To provide exposure to the students with hands-on experience on various basic engineering practices in Civil, Mechanical, Electrical and Electronics Engineering.

GROUP – A (CIVIL & ELECTRICAL)**1. CIVIL ENGINEERING PRACTICE****12****Plumbing**

Basic pipe connections involving the fittings like valves, taps, coupling, unions, reducers, elbows and other components used in household fittings. Preparation of plumbing line sketches.

Laying pipe connection to the suction side of a pump – inlet.

Laying pipe connection to the delivery side of a pump – out let.

Practice in mixed pipe connections: Metal, plastic and flexible pipes used in household appliances.

Wood Work

Sawing, planning and making common joints: T-Joint, Mortise and Tennon joint, Dovetail joint.

Study

Study of joints in door panels, wooden furniture

Study of common industrial trusses using models.

2. ELECTRICAL ENGINEERING PRACTICE**9**

Basic household wiring using switches, fuse, indicator – lamp etc.,

Preparation of wiring diagrams

Stair case light wiring

Tube – light wiring

Study of iron-box, fan with regulator, emergency lamp

GROUP – B (MECHANICAL AND ELECTRONICS)**15****3. MECHANICAL ENGINEERING PRACTICE****Welding**

Arc welding of butt joints, lap joints, tee joints

Gas welding Practice.

Basic Machining

Simple turning, drilling and tapping operations.

Machine assembly Practice.

Study and assembling the following:

Centrifugal pump, mixies and air conditioners.

Demonstration on

(a) Smithy operations like the production of hexagonal bolt.

(b) Foundry operation like mould preparation for grooved pulley.

4. ELECTRONIC ENGINEERING PRACTICE

9

Soldering simple electronic circuits and checking continuity.

Assembling electronic components on a small PCB and testing.

Study of Telephone, FM radio, low-voltage power supplies.

TOTAL : 45 PERIODS

TECHNICAL ENGLISH - II
(For All Branches of B.E / B.Tech programmes)

L T P C

3 1 0 4

OBJECTIVES

- To make the students acquire listening and speaking skills meant for both formal and informal contexts
- To help them develop their reading skills by exposing them to different types of reading strategies
- To equip them with writing skills needed for academic as well as workplace situations
- To make them acquire language skills at their own pace by using e-materials and language lab component.

UNIT I

9 + 3

Listening - Listening to informal conversations and participating; Speaking - Opening a conversation (greetings, comments on something, weather) - Turn taking - Closing a conversation (excuses, general wish, positive comment, thanks); Reading - Developing analytical skills, Deductive and inductive reasoning - Extensive reading; Writing - Effective use of SMS for sending short notes and messages - Using 'emoticons' as symbols in email messages; Grammar - Regular & irregular verbs - Active and passive voice; Vocabulary -

Homonyms (e.g. 'can') - Homophones (e.g. 'some', 'sum'); E-materials - Interactive exercise on Grammar and vocabulary – blogging; Language Lab - Listening to different types of conversation and answering questions.

UNIT II

9 + 3

Listening - Listening to situation based dialogues; Speaking - Conversation practice in real life situations, asking for directions (using polite expressions), giving directions (using imperative sentences), Purchasing goods from a shop, Discussing various aspects of a film (they have already seen) or a book (they have already read); Reading - Reading a short story or an article from newspaper, Critical reading, Comprehension skills; Writing - Writing a review / summary of a story / article, Personal letter (Inviting your friend to a function, congratulating someone for his success, thanking one's friend / relatives); Grammar - modal verbs, Purpose expressions; Vocabulary - Phrasal verbs and their meanings, Using phrasal verbs in sentences; E-materials - Interactive exercise on Grammar and vocabulary, Extensive reading activity (reading stories / novels from links), Posting reviews in blogs - Language Lab - Dialogues (Fill up exercises), Recording students' dialogues.

UNIT III

9 + 3

Listening - Listening to the conversation - Understanding the structure of conversations; Speaking - Conversation skills with a sense of stress, intonation, pronunciation and meaning - Seeking information – expressing feelings (affection, anger, regret etc.); Reading - Speed reading – reading passages with the time limit - Skimming; Writing - Minutes of meeting – format and practice in the preparation of minutes - Writing summary after reading the articles from the journals - Format for the journal articles – elements of technical articles (abstract, introduction, methodology, results, discussion, conclusion, appendices, references) - Writing strategies; Grammar - Conditional clauses - Cause and effect expressions; Vocabulary - Words used as nouns and verbs without any change in the spelling (e.g. 'rock', 'train', 'ring'); E-materials - Interactive exercise on Grammar & vocabulary - Speed Reading practice exercises; Language Lab - Intonation practice using EFLU materials – Attending a meeting and writing minutes.

UNIT IV

9 + 3

Listening - Listening to a telephone conversation, Viewing a model interview (face-to-face, telephonic and video conferencing) and observing the practices; Speaking - Role play practice in telephone skills - listening and responding, -asking questions, -note taking – passing on messages, Role play and mock interview for grasping the interview skills; Reading - Reading the job advertisements and the profile of the company concerned – scanning; Writing - Applying for a job – cover letter - résumé preparation – vision, mission and goals of the candidate; Grammar - Numerical expressions - Connectives (discourse markers); Vocabulary - Idioms and their meanings – using idioms in sentences; E-materials - Interactive exercises

on Grammar & Vocabulary - Different forms of résumés- Filling up a résumé / cover letter;
Language Lab - Telephonic interview – recording the responses - e-résumé writing.

UNIT V

9 + 3

Listening - Viewing a model group discussion and reviewing the performance of each participant - Identifying the characteristics of a good listener; Speaking - Group discussion skills – initiating the discussion – exchanging suggestions and proposals – expressing dissent/ agreement – assertiveness in expressing opinions – mind mapping technique; Reading - Note making skills – making notes from books, or any form of written materials - Intensive reading Writing - Types of reports – Feasibility / Project report – report format – recommendations / suggestions – interpretation of data (using charts for effective presentation); Grammar - Use of clauses; Vocabulary – Collocation; E-materials - Interactive grammar and vocabulary exercises - Sample GD - Pictures for discussion, Interactive grammar and vocabulary exercises - Pictures for discussion; Language Lab - Different models of group discussion.

MA8251

MATHEMATICS II

L T P C

(Common to All Branches of B.E. / B.Tech. Programmes in II Semester) 3 1 0 4

OBJECTIVES

- To make the student acquire sound knowledge of techniques in solving ordinary differential equations that model engineering problems.
- To acquaint the student with the concepts of vector calculus needed for problems in all engineering disciplines.
- To develop an understanding of the standard techniques of complex variable theory so as to enable the student to apply them with confidence, in application areas such as heat conduction, elasticity, fluid dynamics and flow the of electric current.
- To make the student appreciate the purpose of using transforms to create a new domain in which it is easier to handle the problem that is being investigated.

UNIT I DIFFERENTIAL EQUATIONS

9+3

Method of variation of parameters – Method of undetermined coefficients – Homogenous equation of Euler's and Legendre's type – System of simultaneous linear differential equations with constant coefficients.

UNIT II VECTOR CALCULUS

9+3

Gradient and directional derivative – Divergence and Curl – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral and volume integral – Green's, Gauss divergence and Stoke's theorems – Verification and application in evaluating line, surface and volume integrals.

UNIT III ANALYTIC FUNCTION

9+3

Analytic functions – Necessary and sufficient conditions for analyticity – Properties – Harmonic conjugates – Construction of analytic function – Conformal mapping – Mapping by functions $w = z + c$, az , $1/z$, z^2 - Bilinear transformation.

UNIT IV COMPLEX INTEGRATION**9+3**

Line integral – Cauchy’s integral theorem – Cauchy’s integral formula – Taylor’s and Laurent’s series – Singularities – Residues – Residue theorem – Application of residue theorem for evaluation of real integrals – Use of circular contour and semicircular contour with no pole on real axis.

UNIT V LAPLACE TRANSFORMS**9+3**

Existence conditions – Transforms of elementary functions – Transform of unit step function and unit impulse function – Basic properties – Shifting theorems – Transforms of derivatives and integrals – Initial and final value theorems – Inverse transforms – Convolution theorem — Transform of periodic functions – Application to solution of linear ordinary differential equations with constant coefficients.

4. Peter V.O’Neil, Advanced Engineering Mathematics, Cengage Learning India Pvt., Ltd, New Delhi, 2007.

PH8255**PHYSICS OF MATERIALS****L T P C**

**(Common to Chemical, Ceramic, Food, Leather, Industrial
Biotechnology and Pharmaceutical)**

3 0 0 3**UNIT I PREPARATION AND PROCESSING OF MATERIALS****9**

Phases – Phase rule – binary systems – tie line rule – lever rule – phase diagram – invariant reactions – diffusion Fick’s law – Nucleation – homogeneous and heterogeneous nucleation

– Free energy of formation of a critical nucleus – crystal growth – Czochralski, Bridgman, Solution methods - Thin films – preparation: PVD method – Sol-gel method – heat treatment and hardening processes..

UNIT II PROPERTIES OF CONDUCTING AND SUPERCONDUCTING MATERIALS 9

Classical free electron theory of metals –Fermi function - Schrödinger wave equation – Time independent and time dependent equations. Physical significance of wave function, particle in a box (in one dimension) – electrons in a metal - Density of energy states – effect of temperature on Fermi energy – carrier concentration in metals - Superconducting Phenomena, Properties of superconductors – Meissner effect and Isotope effect. Type I and Type II superconductors, High T_c superconductors – Magnetic levitation and SQUIDS.

UNIT III ELECTRONIC MATERIALS 9

Elemental and compound semiconductors – Origin of band gap in solids (qualitative) - Concept of effective mass of electron and hole – carrier concentration in an intrinsic semiconductor (derivation) – Fermi level – Variation of Fermi level with temperature – electrical conductivity – band gap determination – carrier concentration in n-type and p-type semiconductors (derivation) – variation of Fermi level with temperature and impurity concentration – Compound semiconductors – Hall effect – Determination of Hall coefficient – LED and Solar cells.

UNIT IV INSULATING AND MAGNETIC MATERIALS 9

Dielectric, paraelectric and ferroelectric materials – Electronic, Ionic, Orientational and space charge polarization – Internal field and deduction of Clausius Mosotti equation – dielectric loss – different types of dielectric breakdown – classification of insulating materials and their applications – Introduction to magnetic materials - Domain theory of ferromagnetism, Hysteresis, Soft and Hard magnetic materials – Anti-ferromagnetic materials – Ferrites, Giant Magneto Resistance materials. Magnetic bubbles.

UNIT V CERAMIC AND NEW MATERIALS 9

Introduction to Ceramics and its applications - Ceramic Fibres - Fibre reinforced Plastics – Fibre reinforced Metal – Metallic glasses – Shape memory alloys – Copper base alloys – Nickel – Titanium alloys – Relaxor- Ferroelectric materials – Electro and magneto rheological fluids – Sensors and Actuators – polymer semiconductors – photoconducting polymers – liquid crystals – Bio-sensors – Scintillation detectors (Position sensitive) –Bio materials – hydroxyapatite – PMMA – Silicone.

CY8253

CHEMISTRY FOR TECHNOLOGISTS

L T P C

3 0 0 3

UNIT I WATER

9

Water quality parameters- determination of hardness (EDTA method), TDS, BOD, COD and iron and their significance. Softening – Zeolite and demineralization processes. Boiler troubles and remedies – removal of oils and silica, internal conditioning. Desalination by electro-dialysis and reverse osmosis. Water quality parameters and standards for textile wet processing.

UNIT II CHEMISTRY OF INTERFACES

9

Interface region-curved interfaces-thermodynamics of surfaces - Surface film on liquids-Adsorption of gases on Solids-adsorption isotherms. Applications of adsorption studies-detergency, wetting, foaming , defoaming, spreading, water repellency.

UNIT III OILS, FATS, SOAPS & LUBRICANTS

9

Chemical constitution, Chemical analysis of oils and fats – acid, saponification and iodine values, Definitions, determinations and significance. Definition, mechanism of lubrication, preparation of petrolubes, desirable characteristics – viscosity, viscosity index, carbon residue, oxidation stability, flash and fire points, cloud and pour points, aniline point. Semisolid lubricant – greases, preparation of sodium, lithium, calcium and axle greases and uses, consistency test and drop point test. Solid lubricants – graphite and molybdenum disulphide

UNIT IV CHEMICALS AND AUXILIARIES

9

Surfactant Chemistry, bleaching powder, sodium hypochlorite, hydrogen peroxide, chlorine dioxide, preparation, estimation of available chlorine in hypochlorite bleach liquor. determination of strength of hydrogen peroxide.

UNIT V COLORANTS

9

Theory of color and constitution: chromophore and auxochrome, classification of dyes based on application. Chemistry and synthesis of , azo dye.

GE8251

ENGINEERING MECHANICS

L T P C

3 1 0 4

OBJECTIVE

To develop capacity to predict the effect of force and motion in the course of carrying out the design functions of engineering

UNIT I BASICS AND STATICS OF PARTICLES

9+3

Introduction – Units and Dimensions – Laws of Mechanics – Lami's theorem, Parallelogram and triangular Law of forces — Vectorial representation of forces – Vector operations of forces –additions, subtraction, dot product, cross product – Coplanar Forces – rectangular components – Equilibrium of a particle – Forces in space – Equilibrium of a particle in space – Equivalent systems of forces – Principle of transmissibility .

UNIT II EQUILIBRIUM OF RIGID BODIES

9+3

Free body diagram – Types of supports – Action and reaction forces – stable equilibrium – Moments and Couples – Moment of a force about a point and about an axis – Vectorial representation of moments and couples – Scalar components of a moment – Varignon's theorem – Single equivalent force – Equilibrium of Rigid bodies in two dimensions – Equilibrium of Rigid bodies in three dimensions

UNIT III PROPERTIES OF SURFACES AND SOLIDS

9+3

Centroids and centre of mass– Centroids of lines and areas – Rectangular, circular, triangular areas by integration – T section, I section, - Angle section, Hollow section by using standard formula – Theorems of Pappus – Area moments of inertia of plane areas – Rectangular, circular, triangular areas by integration – T section, I section, Angle section, Hollow section by using standard formula – Parallel axis theorem and perpendicular axis theorem – Principal moments of inertia of plane areas – Principal axes of inertia– Mass moment of inertia – mass moment of inertia for prismatic, cylindrical and spherical solids from first principle – Relation to area moments of inertia.

UNIT IV DYNAMICS OF PARTICLES

9+3

Displacements, Velocity and acceleration, their relationship – Relative motion – Curvilinear motion – Newton's laws of motion – Work Energy Equation– Impulse and Momentum – Impact of elastic bodies.

UNIT V FRICTION AND ELEMENTS OF RIGID BODY DYNAMICS

9+3

Friction force – Laws of sliding friction – equilibrium analysis of simple systems with sliding friction – wedge friction-. Rolling resistance – Translation and Rotation of Rigid Bodies – Velocity and acceleration – General Plane motion of simple rigid bodies such as cylinder, disc/ wheel and sphere.

LT8201

INTRODUCTION TO LEATHER MANUFACTURE

L T P C

3 0 0 3

AIM

This course aims at introducing the fundamentals of chemistry and technology of leather manufacture.

OBJECTIVES

Through this course the student gains a comprehensive view of the underpinning science and technology involved in the manufacture of leathers.

UNIT I HIDES/SKINS AND PRESERVATION

10

Functions and properties of skins and hides; Histological characteristics of hides and skins - Cow, Ox, Buff, Cow Calf, buff calf, Goat and Sheep; Chemical constituents of hides and skins; Brief study of various fibrous and non-fibrous proteins;

Standard flaying techniques; Hide/skin putrefaction and factors involved; Various preservation techniques and their principles; Defects in hides and skins; Raw material grading – Size, weight and surface defects as criteria.

UNIT II PRETANNING PROCESSES

12

Principles and objectives of pretanning processes viz., soaking, liming, deliming, bating, pickling, depickling, degreasing and depickling.

UNIT III TANNING PROCESSES

10

Various types of tanning materials; Organic and mineral tanning agents; Principles involved in vegetable and chrome tanning and their mechanism in brief; Combination tannages.

UNIT IV POST TANNING PROCESSES

7

Principles and objectives of post tanning processes viz., rechroming, neutralisation, retanning, dyeing and fatliquoring; Various mechanical operations involved; Methods of drying.

UNIT V FINISHING TECHNIQUES

6

Principles and objectives of leather finishing; Classification of leather finishing; Types of auxiliaries and finishes used; General machinery employed in leather finishing

PH8261

APPLIED PHYSICS LABORATORY
(In common with Textile Technology)

L T P C
0 0 2 1

LIST OF EXPERIMENTS

1. X-ray powder method
2. Study of crystal lattices
3. Torsion test
4. Density measurements of fibres
5. Electrical resistance measurement
6. Optical absorption –Spectrometer
7. FTIR study
8. pH measurement
9. Thermal conductivity
10. Di-electric constant
11. Viscosity of liquid
12. Strain gauge meter – Young's modulus
13. Instrumentation amplifier
14. Electrical conductivity

15. Creep characterization
16. Melt flow index of polymers

TOTAL : 30 PERIODS

CY8261

APPLIED CHEMISTRY LABORATORY
(In common with Textile Technology)

L T P C
0 0 2 1

LIST OF EXPERIMENTS

1. Preparation of solutions with various normality and molarity.
2. Determination of Redwood / Saybolt numbers, kinematic viscosity and viscosity index of lubricating oils
3. Determination of flash point, fire point, cloud and pour point of oils
4. Determination of acid value, saponification number and iodine value of oils
5. Determination of total, temporary, permanent, calcium and magnesium hardness of water samples
6. Determination of chloride, sulphate ,and COD of water samples
7. Determination of purity of washing soda and strength of a commercial acid
8. Estimation of available chlorine in hypochlorite solution
9. Estimation of strength of hydrogen peroxide
10. Synthesis of a dye, preparation of soap and a defoamer

TOTAL : 30 PERIODS

MA8355

PROBABILITY AND RANDOM PROCESSES

L T P C
3 1 0 4

OBJECTIVES

- To provide the necessary basic concepts in probability and random processes and apply them in random signals, linear systems etc. in communications engineering.
- The students will have an exposure of various distributions.

UNIT I RANDOM VARIABLES

9+3

Discrete and Continuous random variables – Moments – Moment generating functions – Binomial, Poisson, Geometric, Uniform, Exponential, Gamma, Weibull and Normal distributions - Functions of a random variable.

UNIT II TWO-DIMENSIONAL RANDOM VARIABLES 9+3

Joint distributions – Marginal and Conditional distributions – Covariance – Correlation and Linear regression – Transformation of random variables – Central limit theorem (for independent and identically distributed random variables).

UNIT III RANDOM PROCESSES 9+3

Classification – Stationary process – Markov process - Poisson process – Random telegraph process.

UNIT IV CORRELATION AND SPECTRAL DENSITIES 9+3

Auto-correlation functions – Cross-correlation functions – Properties – Power spectral density – Cross-spectral density – Properties.

UNIT V LINEAR SYSTEMS WITH RANDOM INPUTS 9+3

Linear time invariant system – System transfer function – Linear systems with random inputs – Auto-correlation and Cross-correlation functions of input and output - White noise.

TOTAL : 60 PERIODS

TEXT BOOKS

1. Ibe, O.C. "Fundamentals of Applied Probability and Random Processes", Elsevier, U.P., 1st Indian Reprint, 2007.
2. Peebles, P.Z., "Probability, Random Variables and Random Signal Principles", Tata McGraw Hill, New Delhi, 4th Edition, 2002.

3. Hwei Hsu, "Schaum's Outline of Theory and Problems of Probability, Random Variables and Random Processes", Tata McGraw Hill, New Delhi, 9th Reprint, 2010.

AIM

To introduce various methods of chemical analysis through sophisticated instruments for accuracy

OBJECTIVES

- To enable students gain fundamental knowledge on various physico-chemical analytical methods
- To make students understand the underpinning science behind various instrumental techniques

UNIT I INTRODUCTION TO SPECTROSCOPICAL METHODS OF ANALYSIS 3

Electromagnetic Radiation; Various ranges, Dual properties, Various energy levels, Interaction of photons with matter, absorbance, and transmittance and their relationship, Permitted energy levels for the electrons of an atom and simple molecules, classification of instrumental methods based on physical properties.

Quantitative Spectroscopy; Lambert's Law, Limitations, Deviations (Real, Chemical, Instrumental) Nesslerimetry. Estimation of inorganic ions such as Fe, Ni and estimation of Nitrite using Beer-Lambert's Law

UNIT II MOLECULAR SPECTROSCOPY 13

Various transitions in organic and inorganic compounds effected by UV, visible and infra red radiations, various energy level diagrams of saturated, unsaturated and carbonyl compounds, excitation by UV and Visible radiations, Woodward-Fieser rules for the calculation of absorption maxima (dienes and carbonyl compounds) Effects of auxochromes and effects of conjugation on the absorption maxima, Instrumentation for UV, VISIBLE and IR spectroscopies (source, Optical parts and Detectors), Multicomponent analysis, Photometric titration (Experimental set-up and various types of titrations); Applications of UV, VISIBLE AND IR spectroscopies.

UNIT III ATOMIC SPECTROSCOPY 5

Atomic Absorption Spectrophotometry; Principle, Instrumentation and Application, Various interferences observed in AAS (Chemical, radiation and excitation); Flame photometry; Principle, Instrumentation and applications

POLARIMETRY AND REFRACTOMETRY 3

Polarimetry and refractometry Principle, instrumentation and Applications

UNIT IV THERMAL ANALYSIS 5

Thermogravimetry: Instrumentation, factors affecting the shapes of thermograms, applications, thermograms of some important compounds ($\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$, $\text{CaC}_2\text{O}_4 \cdot 2\text{H}_2\text{O}$ etc; Differential thermal analysis: principle, Instrumentation and applications, differences between DSC and DTA, Applications of DSC (Inorganic and Polymer samples)

UNIT V CHROMATOGRAPHIC METHODS 6

Classification of chromatographic methods, column, Thin layer, paper, Gas, High performance liquid chromatographical methods (principles, mode of separation, instrumentation and technique)

TOTAL : 45 PERIODS

**EE8252 PRINCIPLES OF ELECTRICAL AND ELECTRONICS ENGINEERING L T P C
3 0 0 3**

UNIT I ELECTRICAL CIRCUITS 9

Basic principles involved in power generation, transmission and use – Ohms Law Kirchoff's Law – steady state solution of DC circuits – Theorem: Thevinin's, Norton's and Superposition Theorems.

UNIT II AC CIRCUITS 9

Introduction to AC circuits – waveforms and RMS value – power and power factor, single phase and three-phase balanced circuits, housing wiring, industrial wiring, materials of wiring.

UNIT III ELECTRICAL MACHINES**9**

Principles of operation and characteristics of DC machines. Transformers (single and three-phase) – synchronous machines – three-phase and single-phase induction motors – (op. Principles).

UNIT IV ELECTRONIC DEVICES & CIRCUITS**9**

Types of Materials –Silicon & Germanium- N type and P type materials – PN Junction –Forward and Reverse Bias –Semiconductor Diodes –Rectification – Bipolar Junction Transistor – Characteristics – transistor as an Amplifier –Introduction to operational Amplifier –Inverting Amplifier –Non Inverting Amplifier –DAC – ADC .

UNIT V MEASUREMENTS & INSTRUMENTATION**9**

Introduction to transducers: pressure, temperature, position, electrical measurements - Classification of instruments – moving coil and moving iron ,Ammeter and Voltmeter – multimeters – dynamometer type Wattmeter – three-phase power measurements – energy meter – megger – instrument transformer (CT and PT)

TOTAL : 45 PERIODS**REFERENCES**

UNIT I**3****INTRODUCTION**

Introduction to Biochemistry, water as a biological solvent, weak acid and bases, pH, buffers, Handerson-Hasselbalch equation, physiological buffers, fitness of the aqueous environment for living organisms.

UNIT II**12****NUCLEIC ACIDS**

DNA - a genetic material, composition of DNA and RNA, generalized structure plan and nomenclature of nucleic acids, features of DNA double helix. Denaturation and annealing of DNA, structure and roles of different types of RNA.

PROTEINS

Amino acids: classification and structures of standard amino acids. Classification of proteins based on solubility, shape, composition and functions. Protein structure : levels of structure and protein architecture, primary structure of proteins, secondary structure of proteins- helix and pleated sheets, tertiary structure of proteins, forces stabilizing the tertiary structure and quarternary structure of proteins, denaturation and renaturation of proteins, behavior of proteins in solutions, salting in and salting out of proteins. Structure and biological functions of fibrous proteins, (keratin, collagen and elastin), globular proteins (hemoglobin and myoglobin), lipoproteins, metalloproteins, glycoproteins and nucleoproteins; Enzymes and their industrial applications.

UNIT III**12****CARBOHYDRATES**

Structure, occurrence and biological importance of monosaccharides, disaccharides and polysaccharides

LIPIDS

Introduction, classification, nomenclature, structure and properties of lipids. Biological significance of fat.

UNIT IV MICROBES- STRUCTURE AND MULTIPLICATION

10

Basics of microbial existence; History of microbiology, classification and nomenclature of microorganisms, microscopic examination of microorganisms, light and electron microscopy;

principles of different staining techniques like gram staining, acid fast, capsular staining, flagellar staining. Structural organization and multiplication of bacteria, viruses, algae and fungi, with special mention of life history of actinomycetes, yeast, mycoplasma and bacteriophages.

UNIT V MICROBIAL NUTRITION AND GROWTH

8

Nutritional requirements for microbial growth. Culture media -Chemical elements as nutrients. Carbon, Nitrogen Hydrogen, Oxygen, Sulfur, Phosphorus and other trace elements definitions of Chemo autotrophs, Chemoheterotrophs, Photo autotrophs, Photo heterotrophs. Media for cultivation of bacteria, fungi, protozoa and algae - Tissue culture media, brief account of animal cell culture, Plant cell culture, Chemically defined media, complex media, Selective media, Differential media, enrichment media and microbiological Assay media

UNIT I INTRODUCTION TO INORGANIC COMPOUNDS 10

A brief survey of the 's' block - binary compounds, complexes, alkalides and electrides. Features of the 'p' block and its elements - expansion of the octet, Lewis structures; 'd' orbitals and transition metals; Coordination compounds –nomenclature, Theories - Coordination theory, Werner's theory; Stereo chemistry

UNIT II MOLECULAR BONDING 10

Shapes of molecules - Valence Shell Electron Pair Repulsion method; Valence bond approach and atomic orbital hybridizations. LCAO-MO theory, pictorial derivation of bonding and antibonding molecular orbitals. MO energy level diagrams for homonuclear diatomics; Redox reactions.

UNIT III OILS, FATS AND WAXES 10

Types of oils-Development of Rancidity in an oil –Factors contributing to rancidity –Free acid value-Saponification value and iodine value of an oil- Methodology of determining these values-Problems on computing free acid, Saponification and Iodine value-Types of Cholesterol- Risk factor in precipitating heart disease- Waxes-Classifications

UNIT IV HETEROCYCLIC AND ANTIMICROBIAL COMPOUNDS 6

Definition and reactions of Pyrrole, Furan, Thiophene, Pyridine - Reactions of furfural-Synthesis of Isoriazid; Antibacterial drugs-Synthesis of Sulphanilamide and sulphapyridine.

UNIT V DYES AND DYEING 9

Classification of dyes based on the mode of application of the dye to the fabric- Structural classification of dyes-Coupling reaction to produce azo dyes-Synthesis of the following azo dyes- Methyl orange, Methyl red and Congo red- Synthesis of Triphenyl methane dyes- Malachite green and para-rosaniline -Phthalein dye-Preparation of Eosin- Introduction to natural dyes and Reactive dyes

LT8303 THEORY OF SKIN PROTEINS AND PRE-TANNING PROCESSES L T P C
3 0 0 3

AIM

To understand the basic structure and function of skin and its components and to understand the various pretanning processes/operations

OBJECTIVES

- To study the structure and properties of various biomolecules present in skin
- To study the basic characteristics of enzymes and proteins involved in the maintenance of skin integrity
- To study the nature, biosynthesis, characteristics, structure and functions of collagen and the role of temperature in the stability of collagen and collagen degradation
- To study the basic principles and technologies of various pretanning processes and operations.

UNIT I COMPONENTS , FUNCTIONS AND COMPOSITION OF SKIN 9

Organization of skin components in different animals; Structure and function of epidermis, dermis, cutaneous and subcutaneous tissues; hair; fat tissue; nerve; erectorpilli muscle; sweat glands; Functions and properties of hides and skins; Chemical constituents of hides and skins; Fibrous and non-fibrous proteins in skin; Structure and properties of mono, di, oligo and polysaccharides; complex carbohydrates; Structure and properties of Fatty acids, Glycerolipids, phospholipids, sphingolipids, glycolipids, steroids; Structure, function and properties of amino acids.

LIST OF EXPERIMENTS

1. Study of DC & AC Starters
2. Wheatstone Bridge and Schering Bridge
3. Speed Control of DC Shunt Motor
4. Load Test on DC Shunt Motor
5. OCC & Load Characteristics of DC Shunt Generator
6. Load Test on Single-Phase Transformer
7. Load Test on Three-Phase Induction Motor
8. Load Test on Single-Phase Induction Motor
9. Study of Transducers
10. ADC and DAC Converters

TOTAL : 45 PERIODS**AIM**

To provide an introduction to the production of chrome and vegetable tanned leathers from raw hides and skins.

OBJECTIVES

To train the students to gain an exposure to

1. Assortment of hides and skins
2. Various methods of Curing
3. Manufacture of wet-blue from hides and skins
4. Manufacture of E.I and vegetable tanned leathers
5. Introduction to various post tanning and finishing processes for the manufacture of upper and garment leathers
6. Introduction to various mechanical operations/processing equipments/devices

TOTAL : 60 PERIODS

OBJECTIVES

To provide the mathematical foundations of numerical techniques for solving linear system, eigen value problems, interpolation, numerical differentiation and integration and the errors associated with them;

To demonstrate the utility of numerical techniques of ordinary and partial differential equations in solving engineering problems where analytical solutions are not readily available.

UNIT I SOLUTION OF EQUATIONS AND EIGEN VALUE PROBLEMS 9+3

Solution of algebraic and transcendental equations - Fixed point iteration method – Newton Raphson method- Solution of linear system of equations - Gauss Elimination method – Pivoting - Gauss-Jordan methods – Iterative methods of Gauss-Jacobi and Gauss-Seidel - Matrix Inversion by Gauss-Jordan method - Eigenvalues of a matrix by Power method and by Jacobi's method.

UNIT II INTERPOLATION AND APPROXIMATION 9+3

Interpolation with unequal intervals - Lagrange interpolation – Newton's divided difference interpolation – Cubic Splines - Interpolation with equal intervals - Newton's forward and backward difference formulae – Least square method - Linear curve fitting.

UNIT III NUMERICAL DIFFERENTIATION AND INTEGRATION 9+3

Approximation of derivatives using interpolation polynomials - Numerical integration using Trapezoidal, Simpson's 1/3 and Simpson's 3/8 rules – Romberg's method - Two point and three point Gaussian quadrature formulae – Evaluation of double integrals by Trapezoidal and Simpson's rules.

UNIT IV INITIAL VALUE PROBLEMS FOR ORDINARY DIFFERENTIAL EQUATIONS 9+3

Single step-methods - Taylor's series method - Euler's method - Modified Euler's method - Fourth order Runge-Kutta method for solving first and second order equations - Multi-step methods - Milne's and Adams-Bashforth predictor-corrector methods for solving first order equations.

UNIT V BOUNDARY VALUE PROBLEMS IN ORDINARY AND PARTIAL DIFFERENTIAL EQUATIONS

9+3

Finite difference methods for solving two-point linear boundary value problems. Finite difference techniques for the solution of two dimensional Laplace's and Poisson's equations on rectangular domain – One dimensional heat-flow equation by explicit and implicit (Crank-Nicholson) methods - One dimensional wave equation by explicit method.

CY8451

PHYSICAL CHEMISTRY

L T P C

3 0 0 3

UNIT I PHASE RULE

9

Definition – Application of phase rule to water system – Thermal Analysis – Cooling curves – Two component system – Eutectic and compound formation-Liquid –liquid equilibria-Distillation of binary liquid mixture- Azeotropic distillation-Fractional distillation-partially miscible liquid-CST-Immiscible liquid-Steam distillation

UNIT II IONIC EQUILIBRIA

9

Acids and bases- Arrhenius concept-Lewis concept- Dissociation of weak acid, weak base-ionic product of water-Buffer solutions –calculation of pH-Henderson's equation-Hydrolysis of salts-Degree of hydrolysis-Determination –acid-base indicators-their applications-solubility product principle-ionic equilibria involving complex ions.

UNIT III COLLOIDS 9

Introduction to colloids – properties of colloids – coagulation of solutions –Origin of charge on colloidal particles –Determination of size of colloidal particles- Donnan Membrane equilibrium – Emulsions – Gels – Applications of colloids

UNIT IV SURFACTANTS 9

Chemical and Physico-chemical types, properties; Rheology : Viscosity. Non-Newtonian flow and Viscoelasticity, Birefringence: electrical and streaming ; X-ray and Neutron scattering. Various Diffusional aspects and applications.

UNIT V APPLICATION TO LEATHER TECHNOLOGY 9

Wetting, Cohesion & Adhesion, Contact Angle, Foams, detergency, Emulsions, stability, Surface properties and Membrane technology.

TOTAL : 45 PERIODS

**LT8401 TECHNOLOGY OF HEAVY LEATHER MANUFACTURE L T P C
3 0 0 3**

AIM

This course aims at imparting knowledge in the technology of making different types of heavy leathers from hides.

OBJECTIVES

At the end of the course, the students will be in a position to understand the property requirements of different kinds of heavy leathers and process aspects for the same

UNIT I SOLE, HARNESS AND SADDLERY LEATHERS 9

Property requirement of sole leathers; Process design considerations; Choice of raw material; Manufacture of vegetable tanned sole leathers – Traditional and modern methods; Chrome tanned sole leathers; Water proofing of sole leathers; Manufacture of harness and saddlery leathers; International standards required for the above heavy leathers

UNIT II INDUSTRIAL LEATHERS 9

Different types of raw materials used, properties required: physical and chemical standards required and process details to achieve the specifications for the following industrial leathers: Belting leathers, honing/stropping leathers, picking band leathers, picker apron leathers. Hydraulic and pneumatic leathers .

UNIT III SPORTS GOODS LEATHERS 9

Different types of raw materials used, physical and chemical properties required and process details to achieve the specifications for the following sports goods leathers: Leathers for football, rugby ball, volley ball, hockey ball and cricket ball. Glove leathers for wicket keepers and boxing. .

UNIT IV FINISHED LEATHERS FROM HIDES 9

Different types of raw materials used, physical and chemical properties required and process details to achieve the specifications for the following leathers: Full chrome, Semi chrome and Chrome retan - uppers, suedes, nubuck, lining, nappa, shrunken grain, upholstery, Dressing of E.I. kips into upper, lining and leathers for leathergoods, burnishable, printed leathers, Case hides.-Kattai and banwar from buff calf; Bag tanned leather and their use in traditional products

UNIT V UPGRADATION AND QUALITY CONTROL 9

Upgradation technologies; Rectification of defects in hides; Control of area, yield, color and finish of leathers; Quality control in heavy leather manufacture.

TOTAL : 45 PERIODS

TEXT BOOKS

1. Choichi Ogiwara, 'A practical guide to heavy leather processing', Fuel and Leather Research Centre, Karachi, 1980.
2. Tuck, D.H. 'The manufacture of upper leathers', Tropical Products Institute, London, 1981.
3. Jyotirmay Dey, 'Practical aspects of the manufacture of upper leather, Indian Leather Technologists Association, Calcutta, 1989.

AIM

To impart knowledge on the chemistry of various inorganic tanning materials and systems

OBJECTIVES

Chemistry of inorganic tanning materials giving more thrust to chrome tanning material and system and a glimpse of other inorganic tanning systems based on Al, Zr, Ti, Fe, Si and P.

UNIT I INTRODUCTION TO COORDINATION CHEMISTRY; METAL IONS IN TANNING**10**

Werner's theory of coordination, origins of coordinative interactions, role of d and f orbitals, definition of ligands, nucleophilicity of ligands and electronegativity of donor atoms, chelation and masking, ligand field stabilisation energy and introduction of factors controlling molecular stability of transition metal complexes. Historical overview of mineral tanning.

UNIT II AQUEOUS CHEMISTRY OF CHROMIUM**8**

Electronic configuration and its implications, common oxidation states of chromium, redox stabilities of chromium (VI) and chromium (III) salts, redox potentials and their interconversion, protolysis, kinetic inertness of chromium (III), basicity, olation, oxolation and polymerisation, Stiasny's series, McClandish precipitation point.

UNIT III FACTORS CONTROLLING CHROME TANNING**8**

Single and double bath chrome tannages and their relative merits and demerits, preparation of basic chromium sulphate (BCS) salt, reaction parameters influencing composition of BCS, kinetics of chrome tanning, diffusion and complexation, effects of float volume, pH, basicity, masking, temperature, drum speed, ageing chrome tanned substrates.

UNIT IV MECHANISM OF CHROME TANNAGE**9**

Theories of chrome tanning; absorption, coating, electrostatic and hydrogen bond interactions and coordinative forces involved in chrome tanning, indirect evidence for chrome binding sites in protein, hydrothermal stability of chrome-collagen compound.

UNIT V OTHER INORGANIC TANNAGES**10**

Aqueous chemistry of aluminium (III), zirconium (IV), titanium (IV) and iron(III) and its relevance to mineral tanning, chemistry of silicates and phosphates and their tanning mechanisms, mechanism of inorganic tannages and their relevance to combination tanning.

TOTAL : 45 PERIODS**REFERENCES**

3. Bienkiewicz 'Physical Chemistry of Leather Manufacture' Krieger, Florida 1982.
4. Covington A D, 'Tanning Chemistry' RSC Publishing, Cambridge, UK, 2009.

LT8403**THEORY AND PRACTICE OF VEGETABLE AND ORGANIC TANNAGES****L T P C
3 0 0 3****AIM**

To make the students understand the chemistry of different vegetable and organic tanning agents and respective technology systems.

OBJECTIVES

- At the end of this course, the students will have knowledge on the chemistry of various vegetable and organic tanning agents and the mechanism of their interaction with the skin protein - Collagen.

UNIT I VEGETABLE TANNINS**14**

Vegetable tannins - definition and classification, Occurrence, Biosynthesis; Chemistry of hydrolysable tannins - gallotannins, ellagi tannins - their structural aspects including tannin dimers, trimers, etc., Chemistry of condensed (flavanoid) tannins proanthocyanidins, dimers, trimers and other oligomers - Isolation and characterization of vegetable tannins.

UNIT II CONSTITUENTS OF VEGETABLE TANNING MATERIALS**7**

Tannins as well as non-tannins, polyphenolic constituents present in popular tanning materials like avaram, konnam, wattle, cutch, babul, myrobalan, etc., and their physico-chemical properties and their effect on the physical properties of leathers.

UNIT III MECHANISM AND PRACTICE OF VEGETABLE TANNING 10

Mechanism of reaction of vegetable tannins with collagen. Electrolytic equilibria, diffusion equilibria, fixation and absorption equilibria. General practices in vegetable tanning. Pit tanning and drum tanning. Manufacture of E.I. leathers - Modern practices in E.I. tanning.

UNIT IV OTHER ORGANIC TANNAGES 8

Mechanism of tanning with Aldehyde, Dialdehydes, oil, Sulphonyl chloride, Quinone,, oxazolidine, phosphonium and other organic tanning agents; wet white leathers; Synthetic tannins - Classification - properties, uses in leather industry - Mechanism of reaction with collagen.

**UNIT V PREPARATION OF VEGETABLE TANNIN EXTRACTS AND
SYNTHETIC TANNING AGENTS 6**

Methods of preparation of vegetable tannin extracts, spray dried vegetable tannins, synthetic and other organic tannages.

TOTAL : 45 PERIODS

6. Gustavson, K.H. "Chemistry of Tanning Processes" Academic Press, New York, 1950.
7. Vegetable and Synthetic Tanning agents, Sundara Rao, V.S., et al – The Leather Industry, (ed. Bu Sadulla, S) Kothari Desk book series, H.C. Kothari Group (Publications Division), Madras, p.71, 1995.

AIM

To impart knowledge on analytical methods for the analysis of leather, leather chemicals and process liquors generated during processing of leathers

OBJECTIVES

At the end of the course, the student would understand

- The analytical chemistry behind testing of leather chemicals and leathers
- The principle used in instrumental techniques
- Various methods of analyses of leather chemicals, spent process liquors and pelts/leathers
- Quality Standards of various leather chemicals and leather end products

UNIT I ANALYSIS OF PRETANNING & TANNING AGENTS/CHEMICALS 15

Principles of analytical methods employed in analysis of pretanning chemicals – Water, Common salt, lime, unhairing, deliming and bating agents; Vegetable tanning materials and extracts; Aldehydes; Chrome extracts and liquors; Zirconium, Titanium, Aluminium, Iron and THPS tanning agents; Specifications recommended by standards organizations.

UNIT II ANALYSIS OF POST TANNING AND FINISHING CHEMICALS 8

Principles of analytical and instrumental methods employed in analysis of neutralising agents, syntans, dyes, oils and fats, fatliquors, post tanning auxiliaries, pigments, resin binders, wax emulsions, fillers, lacquers and lacquer emulsions and finishing auxiliaries; Specifications recommended by standards organizations.

UNIT III ANALYSIS OF PROCESS LIQUORS AND EMISSIONS 8

Principles of analytical and instrumental methods employed in analysis of exhaustion liquors of pretanning, tanning and post tanning processes. Analysis of emissions - air pollutants from leather processing; Specifications recommended by standards organizations.

UNIT IV ANALYSIS OF TANNED LEATHERS 8

Principles of analytical and instrumental methods employed in analysis of various chrome leathers, vegetable tanned leathers; Specifications recommended by standards organizations.

UNIT V ANALYSIS OF ECO-SENSITIVE SUBSTANCES IN LEATHER

6

Principles of analytical and instrumental methods employed in analysis of eco-sensitive substances - Penta chlorophenol (PCP), Formaldehyde, Hexavalent chromium [Cr(VI)], azodyes etc., present in leather chemicals and finished leathers; Application of instrumental techniques such as UV-Vis spectrophotometer, GC,HPLC to analyse these eco-sensitive substances; Specifications recommended by standards organizations.

LT8411

MATERIAL TESTING LABORATORY – I

L T P C

0 0 4 2

AIM

To provide practical knowledge and the skill on chemical analyses of various leather chemicals, process liquors, effluent and pelts/leathers at various stages of processing and eco-sensitive chemicals present in leather.

OBJECTIVES

- At the end of the course, the students will have practical experience and understanding on the analysis of various leather chemicals, pelts/leathers and eco-sensitive substances by means of qualitative and quantitative methods of analyses

ANALYSIS OF LIME

- a. Purity of lime
- b. Total bases

ANALYSIS OF SODIUM SULPHIDE

ANALYSIS OF DELIMITING AGENTS

- a. Analysis of ammonium salts
- b. Analysis of boric acid

ANALYSIS OF BATE

ANALYSIS OF VEGETABLE TANNING MATERIALS

- a. Qualitative analysis
- b. Quantitative analysis
- c. Acids and Salts in Vegetable Tannin Extracts by Different Methods

ANALYSIS OF CHROME TANNING AGENTS

- a. Moisture
- b. Cr_2O_3 content
- c. Acid combined with chromium
- d. Basicity: Proctor and Lehigh basicities
- e. Degree of oxidation

ANALYSIS OF SYNTANS

Quantification of phenolic content & free formaldehyde

ANALYSIS OF OILS AND FATLIQUORS

- a. Moisture
- b. Acid value
- c. Saponification value
- d. Iodine value
- e. Free fatty acids
- f. Unsaponifiables
- g. Total alkalinity

ANALYSIS OF PRETANNED PELTS AND TANNED LEATHERS

ANALYSIS OF PROCESS LIQUORS

Soak, Lime, Pickle Liquor, Chrome and Vegetable tan liquors; BOD, COD, TOC, TDS, TS in composite liquors/waste waters.

TOTAL : 60 PERIODS

AIM

To carry out the practical leather processing of heavy and finished leathers from raw hides.

OBJECTIVES

At the end of the course students will gain confidence in manufacturing

- Heavy leathers like sole, saddle, belting etc., from hides
- Finished leathers from different bovine hides and calf skins

MANUFACTURE OF VEGETABLE TANNED AND CHROME SOLE LEATHERS;

Waterproofing of sole leathers;

Processing of Industrial leathers like belting, hydraulic and pneumatic leathers;

Processing of harness and saddle leathers;

Manufacture of sports goods leathers – football leathers, cricket and hockey ball leathers, sports glove from hides

MANUFACTURE OF FOLLOWING LEATHERS (MINIMUM THREE) FROM DIFFERENT RAW MATERIALS AND TANNAGES:

- Picking band leathers and stropping leathers
- Upholstery leathers
- Upper leathers
- Zug grain upper leathers
- Nappa leathers
- Patent leathers
- Shrunken grain leathers
- Suede upper leathers
- Burnishable upper leathers
- Oil-pull up leather
- Inorganic and organic tannages other than chromium and vegetable respectively.
- Eco friendly options for different unit operations.
- Water and energy saving during leather processing.

TOTAL : 90 PERIODS

UNIT I**9**

Introduction to natural and synthetic polymers; Terms and fundamental concepts; Step-growth polymerization, Carother's equation, Functionality, Crosslinking; PET manufacturing; Chain growth polymerization, Free radical polymerization, Kinetics of free-radical initiation, termination, chain transfer, Mayo's equation, cage effect, autoacceleration, inhibition and retardation;

UNIT II**9**

Polypropylene manufacturing; Acrylic manufacturing; Atom transfer radical polymerization, ionic polymerization, ring opening polymerization; Nylon-6 manufacturing; Co-polymerization and its importance. Copolymer equation, reactivity ratio, tailor making of copolymer properties; Techniques of chain polymerization; Bulk, solution, emulsion, microemulsion and suspension polymerization; chemical modification of fibres; Polymer solution, Flory's theory; Interaction parameter.

UNIT III**9**

Molecular weight and its distribution by: End group analysis, osmometry, light scattering, ultra centrifugation, gel permeation chromatography, intrinsic viscosity; Spectroscopic methods of polymer characterization such as, FTIR. UV, NMR and others.

UNIT IV**9**

Compounding of polymers - fillers, plasticizers, antioxidants, UV stabilizers, colouring agents and flame retardants. Polymer processing - compression, moulding, injection, extrusion, calendaring and film casting; Preparation and properties of polyesters, polyamides, epoxy and silicone polymers; Conductive polymers, super absorbent polymers.

UNIT V**9**

Recycling, remoulding, depolymerisation, incineration, biodegradable polymers.

TOTAL : 45 PERIODS**REFERENCES**

LT8502

TECHNOLOGY OF LIGHT LEATHER MANUFACTURE

L T P C

3 0 0 3

AIM

This course aims at imparting knowledge in the technology of making different types of light leathers from skins.

OBJECTIVES

At the end of the course, the students will be in a position to understand the property variations of different leathers and suitable processing variations that are required in the manufacture of the same.

UNIT I PROPERTIES OF LEATHER

9

Definition and understanding of various physical, chemical and organo-leptic properties of leather.

UNIT II PROPERTY – PROCESS RELATIONSHIP

8

Understanding of the relationship between each leather property and the process parameter of each unit operation/process.

UNIT III PRODUCT BRIEF OF LIGHT LEATHERS 8

Product brief i.e, property requirements w.r.t. product manufacture and use of different light leathers

UNIT IV PROCESS DESIGN 8

Concept of designing the process of manufacture of light leathers of different product briefs.

UNIT V LIGHT LEATHER MANUFACTURE 12

Process of manufacture of leathers such as glazed kid, nappa garment, fine glove, suede garment and lining; Quality control aspects with special reference to light leather manufacture

TOTAL : 45 PERIODS

TEXT BOOKS

1. Briggs, P.S. 'Gloving, clothing and special leathers', Tropical Products Institute, London, 1981.
2. Kartheiz, Fuchs, H.P. 'The Chemistry and technology of Novelty Leathers' FAO, United Nations, Rome.
3. CLRI Process Bulletins.

**LT8503 THEORY AND PRACTICE OF POST TANNING PROCESSES L T P C
3 0 0 3**

AIM

To impart knowledge on chemicals and processes involved in post tanning operations of leather manufacture.

OBJECTIVES

- Post tanning processes like neutralization and its importance to the manufacture of various types of leathers.
- Chemistry of post tanning auxiliaries.
- Mechanism of dyeing, fatliquoring and retanning

UNIT I DYES AND DYEING OF LEATHER 10

Theory of colours, chromophoric groups and their optical absorption, structural features of dyes, factors affecting hue and colour, intensity; Classification of dyes based on their chemical

nature, application and colour index, properties; blending of dyes, theory and practice of colour matching, theory and mechanism of dyeing, chemistry and application of dyeing auxiliaries such as leveling agents, dispersing agents and dye fixatives.

UNIT II FATLIQUORS AND FATLIQUORING OF LEATHER 10

Fatliquors – chemical classification, natural and synthetic oils. Unit operations: Sulphation, sulphonation, sulphitation reactions of oils, role of double bonds and iodine value in oils. Stability of emulsions, grain and particle sizes of emulsions, factors controlling grain sizes of emulsions. Mechanism of fatliquoring process and softening of leathers.

UNIT III SYNTANS AND RETANNING OF LEATHER 10

Classification of syntans, auxiliary, intermediate, replacement syntans and resin tanning agents Sulphonation of naphthalene, naphthols, phenol-formaldehyde condensation reactions, characterisation and photo oxidation mechanisms of phenolic syntans. Bleaching agents and mordants.. Light fast, amino resin, formaldehyde-free, acrylic and PU syntans. Chemistry and mechanism of retanning.

UNIT IV PRACTICE OF POST TANNING PROCESSES AND OPERATIONS 10

Practice of post tanning processes viz., neutralization, retanning, dyeing, fatliquoring and Post tanning process technologies for products from different types of leathers.

UNIT V POST TANNING MECHANICAL OPERATIONS 5

Sammying, splitting and shaving, drying, staking, toggling, buffing etc operations – understanding and judicious application of these operations to meet the end product parameters;

TOTAL : 45 PERIODS

TEXT BOOKS

LT8504

THEORY OF MATERIAL TESTING OF LEATHERS – II

L T P C

3 0 0 3

AIM

To impart knowledge on analytical methods for physical testing of leathers and related microscopical and bacteriological tests of leather and leather chemicals

OBJECTIVES

At the end of the course, the student would understand the

- Principle in microscopical and bacteriological testing related to leather processes
- Mould and pest growth and control in leather
- The analytical methods/principles and instrumental techniques used in physical testing leathers
- Standard and quality control measures of physical testing of leathers

UNIT I MICROSCOPY

10

Mechanical and optical parts of compound microscope, images formed, defects in eye pieces -and their rectification etc. Preparation of microscopical slides, fixing, embedding, sectioning, staining and mounting etc. Fibre structure and assessment - Orientation of fibre structure in curing, soaking, liming, pickling, tanning , post tanning and finishing. Optimal condition of fibre structures in various types of leathers. Assessment of finished leather, heavy leathers and light leathers.

UNIT II BACTERIOLOGY

8

Structure of bacterial cell, nutritional requirements, culture media, sterilization, staining of bacterial cells. Effect of environmental factors on bacterial growth, enzymes of bacteria, biochemical properties of bacteria, control of bacterial growth. Testing of bacterial action on raw hides and skins and in the different stages of Leather Manufacture.

UNIT III MOULD & PEST CONTROL

10

Structure of moulds associated during different stages of leather manufacture. Effect of environmental factors on mould growth. Effect of mould growth during processing of skins/hides, finished leathers, leather goods and during transportation. Testing and prevention of mould growth during processing, storage of finished goods and transportation. Parasitic

diseases of livestock that affect the leather quality - Demodectic - Sarcoptic and Psoroptic mange mites, warble flies, ticks and lice.

UNIT IV PHYSICAL TESTING OF LEATHERS 14

Sampling position for physical testing of leathers. Different physical testing methods - principles involved. Static and Dynamic methods, Non-destructive testing of leathers.

UNIT V STANDARDS AND QUALITY CONTROL 3

Physical characteristics and specifications of various types of leathers

TOTAL : 45 PERIODS

LT8505 PRINCIPLES OF UNIT OPERATIONS AND UNIT PROCESSES L T P C
IN LEATHER AND LEATHER CHEMICALS MANUFACTURE 3 0 0 3

AIM

To impart knowledge on basic concepts of chemical engineering unit operations and processes and application in leather and leather chemicals manufacture

OBJECTIVES

At the end of the course, the student would understand the basic concepts of unit operations, material and energy balances, fluid dynamics mass and heat transfer in various unit operations such as distillation, extraction, drying and humidification size reduction and separation and mixing techniques technology of organic and inorganic chemicals involved in the processing of leather and leather chemicals

UNIT I	CONCEPTS & METERING OF FLUIDS	4
<p>Concepts of Unit operations and Processes, Fundamentals: Unit and Dimensions, Material and Energy Balances. Fluid statics and dynamics, Compressible and incompressible fluids, Newtonian and Non-Newtonian fluids, Measurement of pressure drop and fluid velocity. Pumps, Compressor, Blowers.</p>		
UNIT II	HEAT TRANSFER AND MASS TRANSFER	16
<p>Fundamentals of Heat Transfer, Heat transfer equipment, Heat exchangers, Evaporators and Condensers and Simple Design Calculations.</p> <p>Diffusion: Binary diffusion, concept of mass transfer coefficients and interface mass transfer and stagewise contact.</p> <p>Distillation: Principle of distillation, Application of distillation in leather chemicals and auxiliaries processing.</p> <p>Extraction: Extraction principles, Leaching and Extraction equipment and their application in manufacture of leather chemicals</p> <p>Drying: Drying: Drying characteristics, Theory and mechanism of drying, estimation of drying rate, design and performance of industrial dryers for leather.</p> <p>Humidification: Humidity charts, methods of humidification and dehumidification; Equipments and their design aspects; Humidity control in leather processing.</p>		
UNIT III	MECHANICAL SEPARATIONS	3
<p>Size reduction : Theory and equipment ; application in leather chemical processing</p> <p>Clarification : Principles of clarification, Liquid-Liquid, Liquid-solid and Liquid-gas separations, Application in leather processing and effluent treatment</p> <p>Mixing : Basic theory and application in leather and leather chemical processing.</p>		
UNIT IV	PRINCIPLES OF UNIT PROCESSES	17
<p>General principles of unit operations and unit processes in leather & leather chemicals processing: General concepts of unit operations and unit processes in leather & leather chemicals processing. Development of process flow sheets with reference to leather and leather chemical industries design, control safety pollution abatement. Principles of halogenation, esterification, hydrolysis, oxidation, hydrogenation. Polymerization, sulphonation and sulphonation, diazotization and coupling.</p>		

Tanning agents: Vegetable tannins and Vegetable tannin extracts, Basic Chromium Sulphate, Aluminium, and Zirconium, salts for leather processing.

Oils, fats and detergents: Oils and fats; their nature and products derived from oils and fats, Fatty Acids and Alcohols, waxes and fatliquors.

Synthetic binders: Binders on acrylics, polyamides, polyesters, polyurethanes, polypropylene

Dyes and intermediates & surface coating agents: Raw materials; important unit processes; Types of dye intermediates and dyes; pigments, lacquers

Recent developments in chemicals for leather manufacture: Recent developments like REACH and its implications on leather chemicals; Alternate eco-benign leather chemicals and auxiliaries for leather manufacture.

UNIT V WATER AND INORGANIC CHEMICALS

5

Treatment of water for domestic and industrial purposes, manufacture of sodium chloride, sodium sulphide, sodium sulphite and bisulphite, soda ash, caustic soda, lime, sulphuric and hydrochloric acids.

TOTAL: 45 PERIODS

(Common to all branches of Fifth or Sixth Semester B.E / B.Tech programmes)

OBJECTIVES

- To enhance the employability skills of students with a special focus on Presentation skills, Group discussion skills and Interview skills
- To help them improve their soft skills, including report writing, necessary for the workplace situations
 1. Making presentations – introducing oneself – introducing a topic – answering questions – individual presentation practice
 2. Creating effective PPTs – presenting the visuals effectively
 3. Using body language with awareness – gestures, facial expressions, etc.
 4. Preparing job applications – writing covering letter and résumé
 5. Applying for jobs online – email etiquette
 6. Participating in group discussions – understanding group dynamics – brainstorming the topic
 7. Training in soft skills – persuasive skills – sociability skills – questioning and clarifying skills – mock GD
 8. Writing reports – collecting, analyzing and interpreting data – drafting the report
 9. Attending job interviews – answering questions confidently
 10. Interview etiquette – dress code – body language – mock interview

TOTAL 30: PERIODS

Requirements for a class of 30 students

1. A PC or a lap top with one or two speakers
2. A Collar mike and a speaker
3. An LCD projector and a screen
4. CD's and DVD's on relevant topics
5. Individual chairs for conducting group discussions

MATERIAL TESTING LABORATORY - II

L T P C
0 0 6 3

AIM

To provide practical knowledge on microscopical and microbiological testing of leathers physical testing of leathers.

OBJECTIVES

At the end of the course, the students would have practical experience and understanding in

- Microscopical analysis/identification of leathers
- Microbiological testing of raw skins/hides, pelts and leathers and various process liquors
- Physical testing of leathers

MICROSCOPY LAB

- a. Setting up of a compound microscope
- b. Preparation of microscopical slides by paraffin embedding method and by freezing method
- c. Identification of hides and skins from their histological structures and from their grain pattern-Buffalo, Cow, Sheep and Goat

- d. Microscopical assessment of fibre structure during the process - Soaking, liming, pickling and tanning and different finished leathers.

MICROBIOLOGY LAB

- a. Preparation of various culture media
- b. Staining of bacteria
- c. Enumeration of bacteria in hides and skins and in tan liquors
- d. Isolation and identification of fungi/mold/yeast in raw hides/skins, leathers and tan liquors
- e. Mildew resistance test for leathers
- f. Identification of insect and parasitic damages in skins/hides/leathers (Entomology demo only)

PHYSICAL TESTING LAB

Strength Properties

- a. Tensile Strength and Elongation at break
- b. Tongue tear strength
- c. Stitch tear and slit tear strengths
- d. Grain crack and bursting strengths

Wear and Comfort Properties

- a. Static/dynamic water absorption
- b. Water vapour permeability
- c. Abrasion resistance
- d. Perspiration resistance

Fastness Properties

- a. Rub fastness
- b. Water fastness
- c. Heat fastness
- d. Light fastness
- e. Gloss

TOTAL : 90 PERIODS

AIM

To carry out the practicals for manufacture of light leathers from raw goat, sheep and calf skins.

OBJECTIVES

At the end of the course students will gain confidence in processing

- Upper, Lining, Nappa, Suede, Nubuck, Glove leathers from different skins
- Specialty leathers from different skins

Practical training (minimum 6 leathers) on the manufacture of

White Leather from wet white tanning (compulsory)

Resin and protein upper leathers

Nappa leathers

Glazed kid leathers

Nubuck leathers

Dress glove

Utility glove leathers

Crushed kid leathers

Suede upper leathers

Suede garment leathers

Mesh leathers

Hair-on/Fur-on leathers

Chamois leathers

TOTAL : 60 PERIODS

OBJECTIVE

To educate students about the importance of studying environmental science and engineering in course curriculum and to create awareness in protection of environment.

UNIT I ENVIRONMENT, ECOSYSTEMS, BIODIVERSITY AND SUSTAINABLE DEVELOPMENT 8

Definition of environment and components in the environment- definition of an ecosystem, concept and functions of different ecosystems like (a) forest ecosystem (b) grassland ecosystem (c) desert ecosystem (d) aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)- biodiversity, threats to biodiversity and conservation of biodiversity- sustainable development and significance of sustainable development in environmental related issues.

UNIT II ENVIRONMENTAL POLLUTION AND CHEMISTRY 14

Definition of pollution- different types of environmental pollution- classification of pollutants in water and wastewater – characterization of pollutants in water and wastewater - environmental significance - types of sampling, significance of sampling, precautions to be taken while sampling and preservation of samples.

Atmospheric structure and composition - definition of air pollution – sources and classification of air pollutants and their effect on human health, vegetation, animals, property, aesthetic value and visibility- ambient air quality and emission standards –photochemical smog, ozone layer depletion, greenhouse gases, global warming, acid rain and their effect on environment.

Definition, types and sources of solid and hazardous wastes - need for solid and hazardous waste management – elements of integrated waste management and role of stakeholders – definition, types and sources of nuclear and radioactive wastes – waste management and disposal.

UNIT III WASTEWATER TREATMENT AND DISPOSAL 10

Unit operations and processes- principles of physical treatment: screening, mixing, equalization, sedimentation, filtration - principles of chemical treatment: coagulation, flocculation, precipitation, flotation - objectives of biological wastewater treatment and various process- need for tertiary treatment.

UNIT IV ENVIRONMENTAL IMPACT & RISK ASSESSMENT 9

Definition and over view of Environmental Impact Assessment (EIA), key issues in EIA, legal and regulatory aspects in India – types and limitations of EIA –public participation in EIA- EIA process: screening, scope, setting, analysis – risk analysis - sources of environmental risks – risk management - risk communication and risk perception- emergency preparedness.

UNIT V ENVIRONMENTAL POLICIES AND LEGISLATION 4

Environmental legislations in India- environment protection act – air (prevention and control of pollution) act – water (prevention and control of pollution) act – wildlife protection act – forest

conservation act – solid and hazardous waste management rules - biomedical waste rules – responsibilities of generators- role and responsibility of pollution control boards.

LT8602

LEATHER GOODS AND GARMENTS TECHNOLOGY

LT P C

3 0 0 3

AIM

To impart knowledge on making leather goods and garments

OBJECTIVES

Through this course students will be able know

- various components for the manufacture of leather good and garments
- processing steps involved in the making of leather good and garments
- different machineries involved in the products manufacture
- techniques to design and develop leather goods and garments
- organisation and management of leather goods and garments manufacturing unit

UNIT I OVERVIEW

8

Classification of Leather Goods and Garments; Selection of Materials, grading and assorting of leathers for leather goods & garments ; Property requirements for leather and other materials; Accessories for Leather goods & garments - Various types of fasteners, fittings and other

accessories. Alternative materials and their adaptability for goods and garments. Operational sequences in leather goods and garments production.

UNIT II

12

- i) Production planning - Nomenclature used for component identification in various leather garments skirts, jackets, trouters etc and various leather goods – Wallet, hand bags, Executive bags etc. Process scheduling and line balancing.
- ii) Cutting and clicking - Hand & machine cutting, Knives & tools – Preparation and handling. Pattern interlocking/nesting for material optimization. Factors influencing cutting value.
- iii) Assembling- Pre assembly and assembly operations – skiving, splitting, folding, sewing etc. Various types of assembly techniques for leather goods and garments.
- iv) Quality - Quality control measures in leather products manufacture.

UNIT III MACHINERY

9

Machinery needs for leather goods and garments manufacture. Various types of sewing machines – flat bed, cylinder bed, post bed and other special sewing machines – different feed mechanisms.

Clicking, splitting, skiving, folding, embossing, creasing machines – their working principles operation and maintenance.

UNIT IV DESIGN & DEVELOPMENT

9

Pattern design and development – measurement/ sizing for various types of leather goods & garments, pattern grading for leather garments. CAD applications for leather goods and garments. Fashion and material trends.

UNIT V ORGANISATION & MANAGEMENT

7

Project Feasibility reports, plant lay out, costing and pricing for leather goods and garments. Analysis of International market trends for goods and garments – EU, USA & other markets.

Social auditing of leather goods & garment units - occupational Health & Safety, ISO 9000 & 14000.

LT8603

LEATHER MACHINERIES

L T P C

3 0 0 3

AIM

To impart theory and practical knowledge on the working principles, use and maintenance of machineries used in leather manufacture.

OBJECTIVES

At the end of the course, the students would understand the

- General principles involved in various machineries used in leather manufacture.
- Salient features and purpose of the various machinery used
- Preventive maintenance and safety in the use of leather machinery
- Adjustment of machinery parts for proper functioning of different machines used in leather processing
- Design of optimal machinery layout of tannery

UNIT I GENERAL PRINCIPLES AND MECHANISM OF LEATHER MACHINERY 12

involved in various tannery machines. Mechanism of cutting and shearing action of helical blade systems. Bush, ball, roller and ring oil bearing, cam springs and their application and function in tannery machinery.

UNIT II DESIGN, MATERIAL SELECTION AND CONSTRUCTION OF EQUIPMENT 12

Basic design, material selection and construction of pits, drums and paddles. Pneumatic steering mechanism and control as applied to dust control equipment, air compressor, auto spray, etc. Hydraulic steering mechanism in case of shaving, staking, embossing machines, etc.

UNIT III MECHANICAL FEATURES OF LEATHER MACHINERY 12

Salient features and purpose of the various machinery used in beam house, tanning and finishing yards, unhairing, fleshing, scudding, sammying, setting, shaving, staking, buffing, dedusting, glazing, machines, finiflex, hydraulic press, curtain coating, roller coating, transfer coating, autospry, driers and measuring machine etc.

UNIT IV TANNERY LAYOUT 5

Drawing a neat lay out for a small/medium tannery showing the wet yard and finishing yard by arranging the machines as per the sequence of operation for standard leather processing.

UNIT V PREVENTIVE MAINTENANCE AND SAFETY 4

Preventive maintenance and safety in the use of leather machinery

TOTAL : 45 PERIODS

REFERENCES

1. Walter Landmann, The Machines in the Tannery – A Review of Leather Producing Machinery and Equipment in current use, World Trades Publishing, UK, 2003
2. Thomas C.Thorstensen, Practical Leather Technology- Robert E.krieger Publishing Company, Huntington, New york, 1976.

**LT8604 THEORY AND PRACTICE OF LEATHER FINISHING L T P C
3 0 0 3**

AIM

To impart knowledge on materials and processes/operations involved in leather finishing.

OBJECTIVES

At the end of this course, the students would be in a position to

- Appreciate the role of various finishing agents and auxiliaries used in leather finishing
- Formulate strategies for finishing different types of leathers
- Study various upgradation techniques
- Methods of drying – Toggle drying, paste drying, vacuum drying etc. and preparing the crust

UNIT I COATING SCIENCE 9

Theory of surface coating; Characteristics of various components of coating system; Parameters of the process of coating and its influence on coating characteristics; Testing of coatings.

UNIT II PIGMENTS 9

Classification of pigments; Inorganic, organic, nacreous (pearlescent) and interference pigments - their representation code in the colour index. Different forms of pigments - powders and pastes. Evaluation and control of their brilliance, opacity, particle size, resistance to solvent, heat and light and colour matching.

UNIT III POLYMERIC MATERIALS AND THEIR DISPERSION FORMS 9

General introduction to addition and condensation polymerization; various methods of polymerisations, resins binders - acrylics, vinyls and urethanes, protein binders, cellulose nitrate, cellulose acetate butyrate, - protein binders - lacquers - emulsion and emulsifiers - evaluation and control - solvents and thinners.

UNIT IV PRINCIPLES OF FINISHING, FINISH FORMULATIONS AND THEIR APPLICATION 9

Impregnation: Terminology, types of impregnating binders, characteristics, selection of systems for corrected and full grain impregnation, formulations, application methods and precautions

Finishing: Definition, aims, film formation mechanisms, properties of films such as glass transition temperature/ minimum film forming temperature, transparency, gloss and resistance to heat, light and solvent. Pigment volume concentration, plasticizer, wetting agents, role in dispersion and stability - requirements in multiple coat technique – such as clearing coat, sealer coat, base coat, top and feel coat. Single coat composition methods like spraying, curtain coating, roller coating etc. Cationic finishes and their relative merits. Foam finish; Eco- friendly finishing - Volatile Organic Compounds (VOC) reductions. Finish formulation for various types of leathers.

UNIT V COATING METHODS AND NOVEL FINISHING SYSTEMS 9

Role of equipments like HVLP spray Roller coats, Continuous embossing machines, Dorn Busch, Finiflex, etc. Methods such as oil pull-up, waxy, burnishable, antique, grain suede, screen printing, roller printing, tie and dye finishing. Pearl finishing, easy-care and patent finishing, cationic finishing, foam finishing, transfer foil, lamination, etc.,

TOTAL : 45 PERIODS

- Adjusting the position of different rollers in a splitting machine to get the required thickness while splitting.
- Adjusting the grinding stones to achieve the required level profile in a splitting band knife.
- Adjusting the position of rollers in a shaving machine to achieve proper thickness
- Replacing the worn-out helical blades in a shaving machine
- Procedure to be followed in removing the worn-out knife
- Replacing the rubber beading in a drum door.
- Changing the main ball bearing in a drum
- Tightening the V-belts in a drum
- Adjusting the worn-out staking blades in a slocomb staking machine for proper staking
- Increasing the staking pressure
- Selection and fixing of the emery paper in a buffing machine
- Adjusting the lateral oscillation of a buffing cylinder
- Adjusting the feed roll position for proper buffing
- Fixing the felt in a buffing machine
- Fixing the glass roll in a glazing machine
- Fixing the leather strap to the cast iron bed of a glazing machine
- Increasing the glazing bed
- Adjusting the various knobs in a spray gun to achieve proper spraying over leather
- Adjusting the air compressor pressure for proper spraying

TOTAL : 60 PERIODS

LT8613

TANNERY PRACTICE - IV

L T P C

0 0 4 2

AIM

To provide practical training in various methods of finishing of leathers.

OBJECTIVES

To train the students gain practical experience in:

- Modern methods of finishing
- Use of cross linkers ,Feel modifiers
- Water repellent finish formulations.

- Finishing using Roller coaters, Transfer coating m/c
- Cationic and foam finishing technologies.
- Patent finishing using Roller Coaters
- Trouble shooting in finishing.
- Finishing of various types of leathers – chrome-free, exotic, upholstery and water-repellant leathers

TOTAL : 60 PERIODS

LT8701

LEATHER FOOTWEAR TECHNOLOGY

L T P C

3 0 0 3

AIM

To impart knowledge of various materials and components used in footwear manufacture.

OBJECTIVES

- To give focus on the manufacture, evaluation and application of materials and components used in footwear manufacture

UNIT I FOOTWEAR MATERIALS AND COMPONENTS

9

Different types of upper and lining leathers; Different types of soling materials; Different types of adhesives used in footwear industry; Kinds of insole boards, Grinders; Fasteners; Shoe dressing materials etc.

UNIT II DESIGN AND PATTERN DEVELOPMENT

9

History of shoe; Purposes and styles; Fashion & designs; Preparation of standards and section for men, ladies & children; Classic and other types of shoes and boots.

UNIT III CUTTING, PRE-CLOSING AND CLOSING

13

Principles of cutting – Hand, machine; Clicking room design and management. Checking incoming work, stitchmaking, skiving, punching and gimping, heat embossing, flow moulding, toe puff attachment, attaching linings and scrim, trimming linings, finishing off closed seams. Top line and other edge treatments, local reinforcements, attaching fastners and trims.

UNIT IV PRELASTING AND LASTING

10

Principles and methods of pre-lasting and lasting for different types of construction; Sole attaching; Lasted margin; Upper preparation; Sole preparation; Sole cementing; Upper

cementing; Bottom fillers and shanks; Adhesive drying, Heat activation, Spotting, Pressing, Last slipping, Health and safety, Quality control and fault finding problems- solving.

UNIT V METHODS OF SHOE CONSTRUCTION 4

Various methods of shoe construction; shoe room techniques.

TOTAL : 45 PERIODS

REFERENCES

1. Cott, N.F., "American Shoe Making", Shoe Trades Publishing Co., Cambridge. 1993.
2. "Apparel International" Published by P.F collier and sons, U.K, 1961.

LT8702 PROCESS ECONOMICS AND INDUSTRIAL MANAGEMENT FOR LEATHER SECTOR L T P C 3 0 0 3

AIM

To introduce process economics and industrial management principles to leather technologists

OBJECTIVES

The objective of this course is to teach principles of cost estimation, feasibility analysis, management, organization and quality control that will enable the students to perform as efficient managers.

UNIT I PRINCIPLES OF PRODUCTION MANAGEMENT AND ORGANISATION 15

Planning, organization, staffing, coordination, directing, controlling, communicating, organization as a process and a structure; types of organizations

Method study; work measurement techniques; basic procedure; motion study; motion economy; principles of time study; elements of production control; forecasting; planning; routing; scheduling; dispatching; costs and costs control, inventory and inventory control.

**UNIT II ENGINEERING ECONOMICS FOR TECHNOLOGISTS-INTEREST,
INVESTMENT COSTS AND COST ESTIMATION 10**

Time Value of money; capital costs and depreciation, estimation of capital cost, manufacturing costs and working capital, invested capital and profitability.

UNIT III PROFITABILITY, INVESTMENT ALTERNATIVE AND REPLACEMENT 8

Estimation of project profitability, sensitivity analysis; investment alternatives; replacement policy; forecasting sales; inflation and its impact.

UNIT IV ANNUAL REPORTS AND ANALYSIS OF PERFORMANCE 4

Principles of accounting; balance sheet; income statement; financial ratios; analysis of performance and growth.

UNIT V ECONOMIC BALANCE AND QUALITY CONTROL 8

Essentials of economic balance – Economic balance approach, economic balance for leather and product industries. Elements of quality control, role of control charts in production and quality control.

TOTAL : 45 PERIODS

**LT8711 CREATIVE AND INNOVATIVE PROJECT L T P C
0 0 3 2**

The aim of the this course is to develop students to take intellectual risks, to think creatively, and to create new knowledge through structured, systematic initiatives that encourage the development of creative and innovative skills. The course will help students to identify

innovative projects that promote and inculcate creativity by applying concepts relevant to research applications and practical applications related to leather science and technology. Several novel *learning concepts, models, frameworks and tools that are applicative to learning and applying leather science and technology will be carried out*. Each student will be allowed to choose projects that are creative and innovative in nature, which lead to budding these skills to meet the challenges of the leather sector world-wide.

TOTAL: 30 PERIODS

LT8712	INDUSTRIAL TRAINING / INTERNSHIP	L T P C
		0 0 2 1

Each student is required to undergo a practical training in leather processing unit/ leather chemical manufacturing unit and submit an industrial training report on practical internship undertaken by/assigned to him by the Department. The report should be based on the practical experience gained at the industry duly certified by the issuing authority at the training centre of leather industry. The objective of the training is to make use of the practical knowledge gained on site by the student at various stages of the leather and leather chemical processing. This helps to judge the level of proficiency, originality and capacity for application of the practical knowledge attained by the student during the training period.

Student should undertake this industrial internship/training for a minimum of two weeks during the summer vacation after sixth semester. However evaluation for this course will be done in seventh semester.

TOTAL DURATION: Min 2 WEEKS

LT8713	LEATHER FOOTWEAR – DESIGN AND FABRICATION	L T P C
	LABORATORY	0 0 4 2

- Leather Assortment
- Layout preparation
- Preparation and cutting
- Upper preparation
- Pre Assemble operation
- Closing Operation
- Bottom Stock Preparation
- Lasting and Finishing
- Practice in CAD/CAM and pattern grading using machine.

Practice in classic shoe making; moccasin construction; practice in shoe finishing

TOTAL : 60 PERIODS

MG8654

TOTAL QUALITY MANAGEMENT

L T P C

3 0 0 3

AIM

To provide comprehensive knowledge about the principles, practices, tools and techniques of Total quality management.

OBJECTIVES

- To understand the various principles, practices of TQM to achieve quality.
- To learn the various statistical approaches for Quality control.
- To understand the TQM tools for continuous process improvement.
- To learn the importance of ISO and Quality systems

UNIT I INTRODUCTION

9

Introduction - Need for quality - Evolution of quality - Definition of quality - Dimensions of product and service quality - Basic concepts of TQM – TQM Framework - Contributions of Quality Gurus – Barriers to TQM – Cost of Quality.

UNIT II TQM PRINCIPLES

9

Quality statements - Customer focus –Customer orientation, Customer satisfaction, Customer complaints, Customer retention - Continuous process improvement – PDCA cycle, 5s, Kaizen - Supplier partnership – Partnering, Supplier selection, Supplier Rating.

UNIT III TQM TOOLS & TECHNIQUES I

9

The seven traditional tools of quality – New management tools – Six-sigma: Concepts, methodology, applications to manufacturing, service sector including IT – Bench marking

– Reason to bench mark, Bench marking process – FMEA – Stages, Types.

UNIT IV TQM TOOLS & TECHNIQUES II

9

Quality circles – Quality Function Deployment (QFD) – Taguchi quality loss function – TPM – Concepts, improvement needs – Performance measures - BPR.

UNIT V QUALITY SYSTEMS FOR LEATHER AND LEATHER PRODUCTS 9

Need for ISO 9000- ISO 9000-2000 Quality System – Elements, Documentation, Quality auditing- QS 9000 – ISO 14000 – Concepts, Requirements and Benefits –Quality Council – Leadership, Employee involvement – Motivation, Empowerment, Team and Teamwork, Recognition and Reward.

TOTAL : 45 PERIODS

PROJECT WORK

**L T P C
0 0 24 12**

Each student is required to submit a report on the project undertaken by and assigned to him by the Department. The report should be based on the information available in the literature or data determined in the laboratory/industry. The objective of the project is to make use of the knowledge gained by the student at various stages of the degree programme. This helps to judge the level of proficiency, originality and capacity for application of the knowledge attained by the student at the end of the programme.

VIVA VOCE

The object of the viva-voce examination is to determine whether the objectives of the Project work have been met by the student as well as to assess the originality and initiative of the student as demonstrated in the Project Work.

TOTAL : 240 PERIODS

AIM

To impart knowledge on the advanced physical and chemical concepts of native collagen and collagen processed into leather.

OBJECTIVES

- At the end of the course the students would have gained comprehensive knowledge on the chemistry and physics of molecular architecture, hydration, swelling, phase transitions, dimensional stability, relaxation, shrinkage and cross-linking phenomena of collagen/processed collagen/leather.

UNIT I**10**

Histology and fibre packing in Skins. Techniques for study of macro-ultra and microstructural details of skins. Primary, secondary, tertiary and quaternary structure of collagen.

UNIT II**10**

Molecular architecture of collagen. Inter and intra-chain forces in the stabilisation and aggregation of collagen molecules. Three dimensional network of collagen fibres in skins and leather matrix.

UNIT III**7**

Hydration, fibre swelling and phase transitions in collagen fibres and their role in dimensional stability of skin and leather matrix.

UNIT IV**9**

Molecular mechanisms in relaxation and folding with special reference to native collagen and tanned collagen. Helix to coil transition and effects of thermo-mechanical stress on connective tissue fibres.

UNIT V**9**

Shrinkage and cross linking phenomena in native, chrome tanned and vegetable tanned collagen. Influence of electromagnetic and high energy radiation on native collagen.

LT8002

ADVANCED PHYSICS AND CHEMISTRY OF LEATHER II (PREREQUISITE: ELECTIVE APCL-I)

L T P C

3 0 0 3

AIM

To attempt micro-level understanding of leather making

OBJECTIVES

- To understand hydration of skin protein and its functional sites
- To understand diffusion and transport phenomena in collagenous matrices
- To understand molecular level changes and dimensional changes during various unit processes in leather making
- To relate surface science to leather making.

UNIT I

6

Macro and microporosity of skin and influence of hydration and water structure on the pore size pattern in skin. Functional sites in protein for interactions with vegetable and pretanning materials, Electrophilic and nucleophilic reactions at protein sites.

UNIT II

9

Types of transport of fluids into solid matrices. Diffusion and transport phenomena in collagenous matrices. Kinetics and diffusion of tannery materials, dyes; forced diffusion into collagenous matrices.

UNIT III

15

Molecular level processes and changes in soaking, liming/dehairing, deliming/bating, pickling, tanning, dyeing and Fatliquoring.

UNIT IV**6**

Dimensional changes and Ultra and micro structural variations of skins during soaking, liming, deliming/bating, pickling, tanning, retanning, Fatliquoring and drying as well as finishing with resin and casein finishes.

UNIT V**9**

Surface science application to leather. Surface charge and energy of full chrome and chrome retanned leather. Emulsions in leather processing and the surface charge and potential of leather finish films, adhesion, mechanisms, influence of opacity, refractive index and scattering coefficient of pigments and pigment formulations and factors controlling the stability of leather finish films.

LT8003**CAD/CAM FOR LEATHER PRODUCTS DESIGN
AND MANUFACTURE****L T P C****3 0 0 3****AIM**

To impart knowledge on CAD/CAM for leather products design and manufacture.

OBJECTIVES

- To focus on the computer applications in leather products sector, hardware in cad, pattern engineering, last and sole modelling for footwear and advanced computational techniques in cad, rapid prototyping.

UNIT I COMPUTER APPLICATIONS IN LEATHER AND PRODUCT SECTOR 12

Definition, historical development, scope of applications and advantage. CNC devices for computer aided cutting including laser and water jet, computer aided manufacturing.

UNIT II **HARDWARE IN CAD****12**

Introduction, Principles, Capabilities and operation of graphical workstations, central processing units, graphic terminals, input/output devices, interface and storage devices, networking concepts of LAN and WAN.

Digitization: 2D & 3D Coordinate extracting, principles of digital and analog conversion, digital input/output processing systems.

Output devices: Prints, plotter and cutter. Various types, their working principles and applications.

UNIT III **PATTERN ENGINEERING****8**

Computerized techniques for pattern generation, grading and assessment of leather products patterns, consumption calculations, pattern nesting and costing, stitching etc. through computerized techniques.

UNIT IV **LAST AND SOLE MODELLING FOR FOOTWEAR****7**

Digitization with Microscribe; manipulation and optimization of digitized last; use of macros; last comparison; grading wizard; flattening; 3D visualization of last and styles; concept of e-last; introduction to sole and sole mould design.

**UNIT V **ADVANCED COMPUTATIONAL TECHNIQUES IN CAD, RAPID
PROTOTYPING******6**

Principles and practice; simulation – concepts and applications.

LT8004

CONSUMER BEHAVIOUR AND BUSINESS ORIENTATION

L T P C

3 0 0 3

AIM

To impart consumer behaviour and business orientation skills to students.

OBJECTIVE

- The purpose of this course is to provide an overview of consumer decision making, marketing implications, consumer behaviour, business orientation and issues in business marketing catering to leather sector.

UNIT I CONSUMER DECISION-MAKING AND MARKETING IMPLICATIONS 6

Introduction to the study of consumer behaviour- Stages in Consumer Decision Making- Types of Consumer decision-making -Consumers shopping styles and Trends-Information search and consumers decision-making-Information search and marketing strategies- Dimensions of information search - Impulse Buying of Consumer- an emerging trend.

UNIT II CONSUMER DECISION-MAKING AND BEYOND 7

Models of consumers- Four views of consumer decision-making - Economic, Passive, Cognitive, Emotional-A simple view of consumer decision-making Howard sheth Model- Engel, Kollat and B1ackWell Model- Case studies with reference to India.

UNIT III DETERMINANTS OF CONSUMER BEHAVIOUR 10

- a) Motivation-Abraham Maslow’s need Herz-berg’s two factor theory, Sigmund freud’s Psycho- analytical model of Motivation.
- b) Perception - Selective attention, Exposure and Subliminal Perception Process- Factors for perceptual distortion.
- c) Learning -Pavlovian & Skinner’s approaches in Stimulus Response Theories- Leon festinger’s Cognitive Dissonance Theory.
- d) Beliefs and Attitudes- Cognitive , Affective and Action oriented Attitude.

UNIT IV BUSINESS ORIENTATION**8**

Management roles and functions in a business. Designing and re-designing business process, location, layout, operations planning and control. Basic awareness on the issues impinging on quality, productivity and environment. Principles of double-entry book-keeping: journal entries, cash-book, pass book, and Bank Reconciliation Statement, ledger accounts, trail balance and preparation of final accounts: Trading and Profit and Loss Account; Balance-sheet. Brief introduction to Single-Entry system of record keeping. Sources of risk/venture capital, fixed capital, working capital and a basic awareness of financial services such as leasing and factoring. Managing business growth. The pros and cons of alternative growth options, internal expansion, acquisitions and mergers, integration and diversification. Crisis in business growth.

UNIT V ISSUES IN BUSINESS MARKETING**14**

The concept and application of product life cycle [plc], advertising and publicity, sales and distribution management. The idea of consortium marketing, competitive bidding/tender marketing, negotiating with principal customers. The contemporary perspectives on Infrastructure Development, Product and Procurement Reservation, Marketing Assistance, Subsidies and other Fiscal and Monetary Incentives. National state level and grass-root level financial and non-financial institutions in support of small business development. Credit risk management, contract management, interest risk management, forest risk management, leadership strategic planning.

6. Verma, J.C., and Gурpal Singh, Small Business and Industry-A Handbook for Entrepreneurs, Sage, New Delhi, 2002

AIM

To impart knowledge on eco friendly options for leather processing.

OBJECTIVE

- At the end of the course the students would have gained knowledge on the cleaner process technology in the leather processing during tanning, post tanning and finishing systems. The emphasis on the course content will be on the fundamentals of bio beam house processing.

UNIT I CLEANER PROCESSING - BEAMHOUSE 9

Eco-friendly process technologies: Salt free curing options, sulphide free unhairing systems, ammonia - free deliming, salt free pickling systems, solvent free degreasing systems. Paradigm shift from chemical processing of hides and skins to bio beam house processing.

UNIT II CLEANER PROCESSING: TANNING 9

Less chrome and chrome-free tanning systems. Latest concepts and trends in leather processing. Eco-labelling. Integrated strategies to achieve permissible BOD, COD and TDS standards of tannery effluents.

UNIT III CLEANER PROCESSING: POST TANNING 9

Formaldehyde, Phenol, AOX free post tanning systems; Latest concepts and trends in leather processing. Eco-labelling. Integrated strategies to achieve permissible BOD, COD and TDS standards of tannery effluents.

UNIT IV CLEANER PROCESSING: FINISHING 9

Cleaner processing and solvent free finishing systems; Eco-labelling. integrated strategies to achieve permissible BOD, COD and TDS standards of tannery effluents.

UNIT V ADVANCED FINISHING, SPLIT PROCESSING AND UPGRADATION TECHNIQUES – CLEANER TECHNOLOGIES 9

Role of following finishing equipment like autospray, roller coats, embossing machines, finiflex, auto togglers, stacking machines etc. Techniques such as oil pull-up, waxy, burnishable, crazy horse, antique finish, screen printing, roller printing, tie and dye finishing. metallic effects, patent finishing, cationic finishing, other novel finishing techniques like electrostatic finishing.

Shoe suede, garment suede, grain finished effect and specialty finishes at split leather - processing technologies and finishing techniques specially suited for the purpose. Upgradation of lower ends for better utilisation. Transfer foil, lamination techniques, etc in split finishing. Latest trends.

LT8006 ENGINEERING ECONOMICS AND FINANCE MANAGEMENT L T P C
3 0 0 3

AIM

To impart knowdege on financial management concepts and principles of engineering economics

UNIT I FINANCIAL ACCOUNTING 13

Accounting principles – basic records depreciation – depreciation methods – preparation and interpretation of profit and loss statement – balance sheet – fixed assets – current assets.

UNIT II PROFIT VALUE ANALYSIS 10

Cost valume profit relationship – relevant costs in decision making profit management analysis – break even analysis – margin of safety Angle of incident & multi product break even analysis – Effect of changes in volume selling price fixed cost and variable cost on profit.

UNIT III WORKING CAPITAL MANAGEMENT 8

Current assets and liability decisions – estimation of working capital requirements – Management of accounts receivable – Inventory – cash – inventory valuation methods.

UNIT IV CAPITAL BUDGETING 8

Significance of capital budgeting – payback period – present value method – Accounting rate of return method.

UNIT V ENGINEERING ECONOMICS**7**

Economics – Engineering economics – Demand analysis Laws of demand – Production and cost – Pricing methods

TOTAL : 45 PERIODS**TEXT BOOKS**

LT8007 ENTERPRISE RESOURCE PLANNING FOR LEATHER SECTOR**L T P C****3 0 0 3****AIM**

To introduce enterprise resource planning principles to leather technologists.

OBJECTIVE

- The objective of this course is to teach the principles of ERP technologists involved in enterprise resource and various cases studies in the pre and post implementation of ERP,s that will enable the students to perform as an efficient entrepreneur.

UNIT I INTRODUCTION**6**

1. What is ERP?
2. Need of ERP
3. Advantages of ERP
4. Growth of ERP

UNIT II ERP AND RELATED TECHNOLOGIES**13**

1. Business process Reengineering (BPR)
2. Management Information System (MIS)
3. Decision Support Systems (DSS)

4. Executive Support Systems (ESS)
5. Data Warehousing, Data Mining
6. Online Analytical Processing (OLTP)
7. Supply Chain Management (SCM)
8. Customer Relationship Management (CRM)

UNIT III ERP MODULES & VENDORS 10

1. Finance
2. Production planning, control & maintenance
3. Sales & Distribution
4. Human Resource Management (HRM)
5. Inventory Control System
6. Quality Management
7. ERP Market

UNIT IV ERP IMPLEMENTATION LIFE CYCLES 10

1. Evaluation and selection of ERP package
2. Project planning
3. Implementation team training & testing
4. End user training & Going Live
5. Post Evaluation & Maintenance

UNIT V ERP CASE STUDIES 6

Post implementation review of ERP Packages in Manufacturing, Services, and other Organizations

TOTAL : 45 PERIODS

REFERENCES

1. Leon, A. Enterprise Resource Planning, Tata Mcgraw-hill, 1999.
2. Garg, V.K. and Venkitakrishnan, N.K. ERP Ware: ERP Implementation Framework, Prentice Hall, 1999
3. Garg, V.K. and Venkitakrishnan, N.K. Enterprise Resource Planning Concepts and Practice, PHI Learning Pvt. Ltd., 2004

AIM

This course aims at providing necessary skills for the students in becoming a technocrat.

OBJECTIVE

- To understand the entrepreneurship in leather sector related to industrial enterprise, venture planning and development, techno economic feasible reports, resource management and production. To gain knowledge on market management.

UNIT I GLOBAL LEATHER AND ALLIED INDUSTRIES 6

Concepts and Fundamental Principles in global leather - Factors influencing business environment, Opportunity assessment, Business forecasting and prospective in leather sector - Leather as an economic and export opportunity sector - Influence of national and international environment on the sustainability of the leather sector.

UNIT II VENTURE PLANNING AND DEVELOPMENT AS APPLIED TO LEATHER AND ALLIED SECTOR 12

Resource planning, Product and process selection criteria - Market segmentation and selection - Investment strategies, Business financing systems, Financial analysis for investment decision - Policy issues and legal clearances - Venture planning in tanneries, shoe units, chemical units and leather garments and goods units - Return on investments in leather sector - Financial sensitivity analysis for investments in the leather sector as applied in industrial leather sector.

UNIT III TECHNO - ECONOMIC FEASIBILITY REPORTS (TEFR) FOR LEATHER AND ALLIED SECTOR 5

Components of TEFR - size of projects, Project costing - Selection and means of finance - cash-flow projections - Costing and pricing - Implementation schedules - PERT and related project scheduling charts - TEFR for tannery, shoe plants, leather chemical, leather garments and leather goods units.

UNIT IV RESOURCE MANAGEMENT AND PRODUCTION PLANNING FOR LEATHER AND ALLIED SECTOR 10

Material and money flow - Labour management - Principles of production management - TQM concepts - ISO and related certification methods - Purchase management in leather sector - Credit financing and labour issues in leather sector - Productivity bottlenecks in tanneries and shoe plants and debottlenecking strategies - Inventory control measures for leather sector.

Operations research - time-motion studies - Principles of time management - Management information system - Intranet and Internet communication and its relevance in managing enterprises - Factors concerning system productivity in leather sector.

UNIT V MANAGING GLOBAL LEATHER MARKETS

12

Market demand assessment techniques - Taxation and internal revenue issues - Market forecasting tools and techniques - Brand building - Export - import guidelines and trade issues - Market sensitivity analysis - Global trade in leather - inter-country comparison of strengths and weaknesses at market place - WTO and related issues influencing leather - Eco-criteria and its influence in leather market - Forecasting domestic market for leather products and market driven planning of an enterprise in leather sector.

LT8010

HUMAN RESOURCE DEVELOPMENT

L T P C

3 0 0 3

AIM

To impart human resource management skills to the students.

OBJECTIVES

- The purpose of this course is to provide an overview of human resource management concepts and relate them to contemporary issues.

UNIT I MANAGEMENT AND GENERAL EMPLOYMENT PRACTICES 15

Human resource planning, Organizational design, HR budgeting, Motivation, Leadership, Employee involvement, Ethics, International issues, Job design: Job analysis-Job description, Performance management: Performance appraisals, Workplace behaviour problems

UNIT II STAFFING 6

Equal employment opportunity, recruitment, selection, career planning, organizational exit

UNIT III HUMAN RESOURCE DEVELOPMENT 7

HRD role clusters: Analysis/Assessment roles- Evaluator, Needs analyst, Researcher

Development roles - Evaluator, HRD materials developer, Program designer

Strategic roles – HRD manager, Marketer, Organization – Change agent, Individual – Career development advisor, Instructor/Facilitator, Administrator

Competency development: Technical competence, Managerial competence, Process competence, Helping Competence and Coping Competencies; Training and Development; Organizational Development, Career Development;

Contemporary issues: Knowledge management and learning organizations, BPR, TQM and Intellectual capital management.

UNIT IV	COMPENSATION AND BENEFITS	5
Job evaluation, Pay structures, Benefit programs, Pay delivery administration.		
UNIT V	HEALTH, SAFETY, SECURITY AND LABOUR RELATIONS	12
Employee assistance programs, safety programs, theft, fraud, investigations, corrections; Labour laws, unfair labour practices, collective bargaining		
		TOTAL : 45 PERIODS

TEXT BOOKS AND REFERENCES

1. Mathis, R. L. & Jackson, J. H. (2003). Human Resource Management, (10th ed.), Mason, Ohio: Thomson-Southwestern.

LT8011	INTERNATIONAL MARKETING AND FOREIGN TRADE	L T P C
		3 0 0 3

AIM

To impart knowledge on international marketing and foreign trade aspects of leather industry

OBJECTIVE

- At the end of the course the students would understand the basics of international trade, government policies in export aspects of world trade related to leather sector, custom tariff and international marketing.

UNIT I	9
Basics of International trade - India's trade policy, International trade and Monetary Systems-Marketing Services in International trade Pricing and trade cycles-Precautionary measures to prevent fraud in International trade - International trade Multimodal Transport Operations-Consumer Behavior and Role of international Marketing- Indian market Analysis.	

UNIT II	11
Introduction-Import to India-An over view, Import and the Customs in India-Importation of Goods, Customs Duty and Exemptions-Valuation of Goods under Customs, Clearance of Imported Goods and Goods in Transit-Warehousing of Goods, Import into India.	

India's new foreign trade Policy -Legal frame work of foreign trade Policy-Special focus - General provision on Import and Export-Promotional Measures- Duty exemption/ Duty remission scheme EPCG Scheme -EOU/ EHTP/ STP/ BTP- SEZs.

UNIT III 11

Marketing concepts and Import-Forms of organization in Import and domestic Trade-- Products, Sales forecasting and sales Management-pricing, Promotion, Branding and Advertising.

Retail Management - Introduction to Logistics - Parameters of Supply Chain Management - Management of logistics and Supply Chain - -Consumer Supply Chain Relationship.

UNIT IV 5

The Customs Tariff Act-Exemptions in Import-by UN and its agencies and their officials-Import by UN or international organizations for execution of projects in India-Imports by Government Diplomats, Trade representatives etc.-Customs Tariff

UNIT V 9

Marketing Management in the Indian context Introduction-concept-process functions-Role of Marketing in modern Organization- Marketing environment-Socio economic forces- Marketing Planning-Understanding BuyerandOrganizational behavior- -Product Management -ricing decisions-Promotion Decisions.

LT8012	LEATHER AND LEATHER PRODUCTS COSTING	L T P C
		3 0 0 3

UNIT I 9

Cost accounting, elements of cost, classification of cost elements – examples from textile industry, methods of costing

UNIT II	5
Cost profit volume analysis, breakeven analysis; standard costing, analysis of variance	
UNIT III	17
Costing of leather and leather products – material, labour, power and overhead expenses	
UNIT IV	9
Foreign exchange mechanisms, exchange rates; foreign exchange exposure management – risks, strategies to reduce risk	
UNIT V	5
Budget, types of budgets, budgeting and control in tanneries and leather products industry	
TOTAL : 45 PERIODS

LT8013

LEATHER AND PRODUCT MERCHANDISING

L T P C

3 0 0 3

AIM

To impart knowledge on leather products merchandising that relates to the domestic and global leather and leather product merchandising.

OBJECTIVES

To understand

- Fundamentals of purchasing
- Retail sector
- Global Market

UNIT I PRINCIPLES OF MARKETING MANAGEMENT 9

Introduction, Definition, Importance and Scope of Marketing, Philosophies of Marketing Management, Elements of Marketing - Needs, Wants, Demands, Customer, Consumer, Markets and Marketers; Marketing Vs Selling, Consumer Markets and Industrial Markets. Concept of Marketing Management, Marketing – Mix, Functions of Marketing Management, Marketing Organisations, Qualities of Marketing Manager.

Marketing Environment, Factors Affecting Marketing Environment, Marketing Information System and Marketing Research, Strategic Marketing Planning.

UNIT II PURCHASING PRINCIPLES AND MANAGEMENT 9

Purchasing scope and development - Strategic aspects of purchasing - Key purchasing -variables consideration - Purchasing negotiations & competitive – Bidding - Outsourcing -purchasing operation - Buying capital goods & services - Purchasing for resale - Purchasing systems and technology - Evaluation of purchasing performance - Purchasing ethics and legal issues

UNIT III PRINCIPLES AND PRACTICE OF MERCHANDISING 9

Merchandising concepts, technology, systems, planning - Merchandise pricing and budgeting, sample handling - Managing merchandise assortments - Developing and - presenting product lines - Introduction to shipping operation

UNIT IV RETAIL SECTOR OF LEATHER 9

Overview of retailing; Changing retail environment - Typology of retail buying - Understanding the consumer - Competitive strategies in the retail industry - Retail location strategy; Store layout & Design - Product planning and selection; Inventory management - Retail pricing; Retail communication - Customer Service

UNIT V GLOBAL SOURCING OF LEATHER 9

Globalization and its influences - The role and importance of global sourcing - Global sourcing process and strategy - Investigation and tendering - Supplier selection and development -

Operationalization of global sourcing strategy - Performance Measurement - The benefits and challenges of global sourcing - Coping with custom clearance uncertainties - Sourcing on the Internet - Supplier relationship development - Merchandising language for sourcing

LT8014

LEATHER PRODUCTS MACHINERY

**L T P C
3 0 0 3**

AIM

To impart knowledge on leather products machinery used in leather sector.

OBJECTIVES

- To focus on the hand tools and machines, machines for shoe and footwear construction, system, automation in leather product machines and modular manufacturing and layout.

UNIT I HAND TOOLS AND MACHINES

8

Hand tools and machinery used in leather and leather products making and other auxiliaries operations – General constructions - Principles involved in their working - Power transmissions systems. The machinery: Pattern grading, clicking Press, splitting, skiving, edge-folding, stamp Marking, sewing, punching, crimping, eyeleting, Seam-rubbing and taping, thermo-cementing, Pre-forming, etc.

UNIT II MACHINES FOR SHOE AND FOOTWEAR CONSTRUCTION 8

Machines used in cemented, stitch down, welted, string lasted, DVP & DIP and other types of construction. Principles involved in their working - trouble shooting and preventive maintenance. Spare parts planning and inventing control.

UNIT III TRANSPORT SYSTEM 5

Different types of material handling system in leather products industry. Manual, semi-automatic and automatic conveyors.

UNIT IV AUTOMATION IN LEATHER PRODUCT MACHINES 11

Application of computer/microprocessor base leather products making machines, principle and operation technique, safety measurements computerized controls, micro-processor links, and used of Robotics Die Less Cutting Systems. CAM for automatic stitching and other advance footwear machinery.

UNIT V MODULAR MANUFACTURING AND LAYOUT 13

Productivity improvements: scheduling, Simulation, Toyota and rink system and Lean manufacturing system.

Factors affecting plant location and construction of factory building for balancing the production line in footwear Industry. Application of Neural-network software in layout preparation.

TOTAL : 45 PERIODS

REFERENCES

1. Thornton, J.H, "Text Book of Footwear Manufacture", National Trade Press Ltd., London, 1970.
2. Blakeman, J., "An Introduction to applied Science for Boot and Shoe Manufacture", The Anglo American Technical Co.Ltd., London,1924.

LT8015 ORGANISATION AND MANAGEMENT OF LEATHER MANUFACTURE L T P C 3 0 0 3

UNIT I TRENDS IN LIVESTOCK POPULATION 5

Categories of livestock, global distribution, India's share, distribution livestock in India, growth rates, trends and relative importance , projections.

UNIT II AVAILABILITY AND MARKETING OF HIDES AND SKINS 10

Concepts, global availability , India,s share in the world , trends in meat production and consumption practices , fallen animal recovery systems , off-take rates(slaughter and mortality rates), availability of hides and skins , projections

Collection and mobilization of hides and skins, Origin and characteristics, Transportation, Grading systems, Pricing, major markets and sourcing of hides and skins, Broad features of marketing.

UNIT III STRUCTURE OF TANNING INDUSTRY AND LEATHER PRODUCT INDUSTRIES IN INDIA 10

Distribution of tanneries in India, scale of operation, type of ownership, line of specialization, capacity and production, employment pattern, industrial policy , environmental issues , leather complexes

Categories of products, distribution of footwear, leather garments, leather goods industries, scale of operation, ownership pattern, capacity and production, industrial policy, employment, exports and domestic market.

UNIT IV INDIA'S FOREIGN TRADE AND POLICY 5

Economic and social importance of leather sector, trade terms, trends in the exports, major importing countries, imports of India, review of trade policy and impact.

UNIT V GLOBAL MARKET FOR LEATHER AND LEATHER PRODUCTS 15

Shifts in production bases, structure of global market, trends in the global trade, major markets, competitors for India, dynamics of global leather trade.

EMERGING DIMENSIONS IN THE GLOBAL TRADE: Non- price Competition , Trade related Environmental and Social issues , Eco- labels and Social certification , E- Commerce ,impact of World Trade Organisation .

STRATEGIES FOR EXPORT PROMOTION : Identification of critical factors, Role of various organizations, Planning and sustainable development ,Trade policy, Developing market network and market intelligence, Resource and product related strategies.

LT8016

SAFETY IN LEATHER INDUSTRIES

**L T P C
3 0 0 3**

AIM

To impart knowledge on Occupational Safety and Hazard aspects in leather manufacture

OBJECTIVES

To understand

1. legal framework of safety & health in India and international conventions
2. hazard identification and assessment
3. productive machine safety in the leather industry
4. work ecology and ergonomics
5. emergency prevention and preparedness safety & health management

UNIT I SAFETY PHILOSOPHY, HAZARD IDENTIFICATION AND ASSESSMENT 10

Legal framework of safety & health in India International conventions and trends Responsibilities and enforcement mechanism. Need for safety & health (cost/benefit rational; safety, environment and productivity triangle); Role of industrial hygiene, Hazard classification (hazard categories and groups), Hazard identification and assessment (tools and methods).

UNIT II SAFETY IN USE OF HAZARDOUS SUBSTANCES AT WORK 8

Chemical and biological hazards in the work place in the leather industry; Health effects of chemical and biological exposure Hazard information systems on hazardous substances (material safety data sheets, labelling) Workplace exposure monitoring and evaluation Hazard prevention and control measures (storage, handling and disposal) in the leather industry.

UNIT III PRODUCTIVE MACHINE SAFETY IN THE LEATHER INDUSTRY, WORK ECOLOGY AND ERGONOMICS 17

Safety hazards of machinery, machine tools and electrical installations ; Hazard prevention and safeguarding of machinery (guards, machine controls, ergonomics) ; Role of preventive maintenance; Safe workstation design and layout, Manual handling of material; Lighting (standards, use of natural and artificial illumination); Climate control (standards, temperature/humidity, improving general ventilation); Noise management (standards, prevention and protection); Safety of factory premises and installations (railings, flooring, safe structures); Welfare measures; Personal protection and hygiene (selection, use, maintenance);

UNIT IV EMERGENCY PREVENTION AND PREPAREDNESS 7

Planning for emergencies; Control of fire and explosion; Dealing with medical emergencies

UNIT V SAFETY & HEALTH MANAGEMENT AND PROMOTION 3

Promoting safety & health practices at the workplace (training, safety and warning signs); Role and responsibilities of managers, supervisors and workers.

TOTAL : 45 PERIODS

**LT8017 SCIENCE AND TECHNOLOGY OF LEATHER AUXILIARIES L T P C
3 0 0 3**

AIM

This course aims to impart knowledge on the chemistry and properties of various auxiliaries used in leather processing

UNIT I	9
Definition and function of leather auxiliaries, role of wetting agents, syntans, fatliquors, dyes, pigments, binder, top coats, feel modifiers and matting agents in leather processing. Surface tension and principles of wetting, importance of HLB, Chemical classification of wetting agents.	
UNIT II	9
Chemical classification of syntans, sulphonation of naphthalene, phenols, Naphols, Phenol formaldehyde condensation reactions, chemistry of light fast syntans, chemistry of amino resins and PU, Unit operations in syntan manufacture.	
UNIT III	13
Composition of fatliquors; Functionalisation of oils for surface active function, chemical classification natural and synthetic oils, sulphation, sulphonation, sulphitation reactions of oils, role of double bonds and iodine value in functionalisation of oils, sulphochlorination, sulphoamidation, transesterification, phosphorylation reactions for fatliqur preparation. Stability of emulsions, grain and particle sizes of emulsions, factors controlling grain sizes of emulsions. Fatliqur manufacturing technology.	
Theory of colors, chromphoric groups, structural features of dyes; acid, basic and reactive dye classification. Chemistry and technology of dye manufacture.	
UNIT IV	9
Definition of pigments, groups of polymer bases for colour. Classification, formulations of pigments, particle size, refractive index, density, opacity criteria for the choice of pigment bases, Different techniques in particle size reduction and importance of particle size on functional properties of pigment formulation.	
Functional definition of binders, chemical classification of binders, acrylic, protein, polyurethane, introduction to manufacturing of binder formulations.	
UNIT V	5
Different types of top coat formulations, choice of polymers for surface protection, role of plasticizers, internal and external plasticizers.	
Principles of feel modification of polymer surfaces, types of feel modifiers and matting agents.	
TOTAL : 45 PERIODS

LT8018

SCIENCE AND TECHNOLOGY OF LEATHER SUPPLEMENTS AND SYNTHETICS

L T P C

3 0 0 3

AIM

To impart knowledge on the use of leather supplements used as substitutes for leather in the manufacture of leather products

OBJECTIVE

- At the end of the course the students would have gained knowledge on the chemistry of most common polymeric materials used in leather industry as supplements. The emphasis on the course content will be on the fundamentals of polymerization of various polymers used. Analytical skills on testing of polymers will be emphasized that will enable them to understand various polymer properties and manufacturing methods.

UNIT I

6

Technology of the most common polymeric materials used in leather industry as supplements. Polymer and Rubber industries in India.

UNIT II

15

Manufacture of industrially important polymers for plastics, fibres and lastomer - Polyethylene, polypylene, polyvinyl chloride, polyvinyl alcohol, polyacrylonitrile, polystyrene, polyurethane, fluoro-carbon polymers, epoxy resins, polyamides, polyesters, alkyd resins, silicone polymers, cellulosics.

UNIT III

6

Fabrication of polymeric materials, compounding and mixing, casting, extrusion, fibre spinning, molding, coating, foam fabrication.

UNIT IV**8**

Testing of polymers. Mechanical and Thermal testing.

UNIT V**10**

Manufacture of rubber and elastomers. Natural rubber, processing, vulcanizing synthetic elastomers, butadiene copolymer, natural rubber, polyisoprene polybutadiene. Polymer and rubber industries in India.

TOTAL : 45 PERIODS**REFERENCES**

LT8019**TECHNOLOGY OF ANIMAL AND TANNERY BY
PRODUCTS UTILISATION****L T P C****3 0 0 3****AIM**

To impart knowledge on the preparation and use of tannery by-products that emerge during the preservation and manufacture of leather and leather products.

OBJECTIVE

- At the end of the course the students would have gained knowledge on the preparation of several by-products emerging out of the leather and leather products sector.

UNIT I INTRODUCTION.**9**

Types of animal byproducts - from abattoirs, meat processing plants, poultry, fishing and other sources including fallen animals. Present methods of collection, processing and utilisation in developing countries vis - a - vis developed countries : conservation techniques and concept of two tier technology. Protein meals from animals by-products including fallen animals and their significance in livestock feeds

AIM

To impart knowledge of value engineering and reengineering and relating them to leather industry.

OBJECTIVE

- To address value engineering through the objectives, different stages, procedures and implementation of reengineering.
- To make students apply the learned concepts in a case study/project.

**UNIT I FUNDAMENTALS OF VALUE ENGINEERING AS APPLIED TO LEATHER
 MANUFACTURE**

8

Value- Types –How to add value-Job plan – techniques employed- Who will do value engineering- Organizing the value engineering study-Benefits in leather and allied industries

**UNIT II STEP BY STEP APPLICATION OF JOB PLAN IN LEATHER RELATED
 INDUSTRIES**

10

Selection of project and team members – general phase – information phase – function phase – creative phase – evaluation phase – Investigation phase – implementation phase – Audit-in leather and allied industries

**UNIT III WORK SHEETS AND GUIDE LINES FOR LEATHER AND ALLIED
 INDUSTRIES**

9

Preparation of worksheets – general and information phase – Function Classification, relationship and summary- Meaningful costs- Cost analysis- Idea listing and Comparison – Feasibility ranking – Investigator phase, study summary – guidelines for writing value engineering proposal – Financial aspects – Life cycle cost analysis – Oral presentation – Audit – Case studies and Discussion.

**UNIT IV REENGINEERING PRINCIPLES IN LEATHER PROCESSING AND
 IN LEATHER PRODUCT SECTOR**

10

The 6 R's of organizational transformation and reengineering – process reengineering - preparing the workforce – Methodology – PMI leadership expectation – Production and service improvement model – Process improvement in leather and allied industries.

UNIT V IMPLEMENTATION OF REENGINEERING IN LEATHER SECTOR 8

Process analysis techniques – Work flow analysis – Value analysis approach – Nominal group technique – Fish bone diagram – Pareto analysis – team building – Force fields analysis – Implementation in leather and allied industries.

**LT8021 LEATHER BIOTECHNOLOGY AND ITS APPLICATION IN LEATHER L T P C
3 0 0 3**

UNIT I PROTEINS AND NUCLEIC ACID & ENZYMOLOGY 10

Chemistry of DNA and RNA: Structure, Conformation and function Proteins - Chemistry, structure and Function, Separation Principles in proteins. Classification, assay, characterization, mechanism of action, enzyme kinetics, immobilized enzymes.

UNIT II GENETIC ENGINEERING (RECOMBINANT DNA TECHNOLOGY 10

Principles and methods: Essentials of biotechnology - products of biotechnology, Restriction enzymes, vectors, DNA cloning strategies.

UNIT III BIOTECHNOLOGY FOR HIDES/SKINS IMPROVEMENT 13

Applications in Animal nutrition and animal production: embryo transfer, gene transfer, transgenic animals. Cleaner Leather Processing : Use of enzyme options in beam house operations - Soaking, unhairing, bating, degreasing, offal treatment: Types of enzymes - proteases, lipases - properties, assay systems and production. Types of fermentation, Preparation of media, preparation of inoculum, separation and purification of products.

UNIT IV WASTE MANAGEMENT FOR LEATHER 8

General features of the organic and inorganic pollutants of tannery. Stabilisation and disposal of organic and chemical wastes and their biological treatment. Possible energy generation from wastes.

UNIT V UTILISATION OF COLLAGENOUS TISSUES FOR BIOMEDICAL AND OTHER APPLICATIONS 4

Collagen and its application in food, cosmetic and medical fields.

LT8022 COMPUTER APPLICATIONS FOR LEATHER AND LEATHER PRODUCTS L T P C 3 0 0 3

AIM

To make students capable of using Computer and related technologies for an effective management of leather and leather products industry

OBJECTIVES

To expose the students to Systems analysis concepts, application aspects of DBMS, Data communication principles, Web Designing, ERP, MIS, E-Commerce and CAD applications in leather/leather products manufacture

UNIT I	SYSTEMS ANALYSIS & DESIGN AND IT INFRASTRUCTURE	8
Definition of a System; System development life cycle- System study; System analysis; System Design (Input, output, files, procedure); Implementation and maintenance; Need for the IT Infrastructure; Form factor; Data Center & Disaster Recovery; Security & Threads.		
UNIT II	DATABASE MANAGEMENT SYSTEM	7
Different types of Database Management Systems and SQL; DDL, DML - Retrieving, Manipulating, Updating tables; Concepts on Leather Industry specific database – with respect to Leather Processing and Product Industry;		
UNIT III	DATA COMMUNICATIONS	7
Concept of Data Communication, Modes of Transmission -Digital Vs Analog, SerialVs Parallel, Synchronous Vs Asynchronous; Types of Communication - Simplex, Half Duplex, Full Duplex; Communication channels - Twisted pair cables, Coaxial cables, Optical Fiber, Radio Waves, Satellites; Communication Protocols - FTP, HTTP, TCP/IP, WAP; Data Communication Devices; Network topologies; Network Types (LAN, WAN and MAN), Data Communication Terminologies in Internet – WWW-Website-Webpage-HTML-URL.		
UNIT IV	CONCEPTS FOR WEB BASED APPLICATIONS	12
Tools for Web Designing, Management Information System, ERP System for Leather Processing – Material Management and Inventory Control, Production Planning.		
UNIT V		11
E-COMMERCE		
E-Commerce-Definition; Traditional Commerce V/s E-Commerce; Benefits of e-commerce; Various e-commerce models-B2B, B2C;		
CAD SYSTEMS		
CAD Systems for Leather & Leather Products- Pattern grading & cutting for footwear, leather goods and garments; Design and development of Leather products; Computerised color matching systems – its principle and application.
